SMERA has upgraded the ratings on the Rs.3.00 crore long term (fund based) bank facility of Del Trade International Private Limited (Del Trade) to '**SMERA BB**' (read as **SMERA double B**) from '**SMERA B+**' (read as **SMERA B plus**) and the Rs.13.00 crore short term (non-fund based) bank facility to '**SMERA A4+**' (read as **SMERA A four plus**) from '**SMERA A4**' (read as **SMERA A four**). The outlook is '**Stable**'.

The ratings upgrade is in view of the healthy growth in the operating income. The company registered compounded annual growth rate (CAGR) of 131 per cent over the last three years ended FY2014-15 owing to expansion of product portfolio, addition of reputed customers such as Zydus Cadilla, and Sun Pharmaceutical Limited coupled with healthy net margins of 1.99 per cent as on March 31, 2015. The rating upgrade also factors in improvement in working capital cycle to 33 days in FY2014-15 from 89 days in FY2012-13, healthy capital, moderate interest coverage indicators and moderate utilisation (84 per cent) of cash credit limit from March to October 2015.

The company has interest bearing unsecured loans from promoters, friends and relatives worth Rs.8.45 crore in FY2014-15 that are subordinated to bank debt and will remain in the business over the medium term. SMERA has treated such unsecured loans as quasi-equity.

The ratings continue to derive comfort from the company's experienced management and moderate financial risk profile. The ratings also draw support from the healthy relations with customers and suppliers. However, the aforementioned strengths are partially offset by the intense competition in the pharmaceutical industry and the working capital intensive operations.

## **Outlook: Stable**

SMERA believes that Del Trade will continue to benefit over the medium term, on account of the experienced management, established market position in the trading of API's and packaging segment. The outlook may be revised to 'Positive' if Del Trade reports higher than expected revenues and profitability, or prudent working capital management. Conversely, the outlook may

be revised to 'Negative', in case of decline in the company's revenue, profitability or if there's significant deterioration in the capital structure on account of larger-than-expected working capital requirements. Additionally, large, debt-funded capital expenditure (capex) taken up by the company may also adversely impact the financial risk profile.

## Rating Sensitivity Factors

- Scale of operations
- Customer diversification
- Working capital cycle
