## Weaknesses

### • Working capital intensive operations

The Gold Star group's operations are working-capital-intensive with gross current assets (GCA) of 261 days in FY2017 as against 280 days in FY2016. The receivables stood at 161 days in FY2017 (PY: 175 days). Overall, the working capital cycle improved marginally to 131 days in FY2017 as compared to 144 days in FY2016. The average bank limit utilisation has been ~65 per cent in the last six months ended September 30, 2017.

### • Exposure to volatility in raw material prices and foreign exchange fluctuation risk

The group is exposed to volatility in gold and diamond prices. The raw material is procured from the domestic (44 per cent) and overseas (56 per cent) markets. The Gold Star group derives over 95 per cent of its revenues from export sales. Hence, the profits are susceptible to fluctuations in forex rates. Moreover, the group borrows dollar denominated debt in order to support operations. The group has efficiently managed its forex risk over the past three years despite fluctuations in exchange rates. Though, the group hedges the fluctuation risk by purchasing gold forwards, the revenues still remain susceptible to volatility in the dollar rates.

## Analytical Approach

SMERA has considered the consolidated business and financial risk profiles of Gold Star Jewellery Private Limited (GSJPL) and Gold Star Diamond Private Limited (GSDPL). Hereinafter refer to as the 'Gold Star Group'. The consolidation is due to the common promoters, shared brand name, common treasury and financial synergies within the group.

## Outlook: Stable

SMERA believes that the Gold Star group will continue to maintain a stable outlook over the medium term owing to its established market position and experienced management. The outlook may be revised to 'Positive' in case the company achieves sustained growth in revenues and higher-than-expected improvement in profitability, working capital management and debt protection metrics. Conversely, the outlook may be revised to 'Negative' in case of decline in revenues and operating profit margins, or deterioration in the capital structure and liquidity position on account of higher-than-expected working capital requirements.
