### Key Rating Drivers

#### Strengths

- **Experienced management**

MMPL established in 2013 was promoted by Mr. Mohammed Naveed Shaik. The company is an authorised dealer of Hyundai Motors and also deals in sale of spare parts and servicing of vehicles. The promoters have more than two decades of experience in the dealership business.

- **Improving operating income**

As per FY2015-16, the operating income stood at Rs.25.49 crore as against Rs.10.13 cr in FY2014-15. The company registered healthy revenue growth rate over the previous year mainly on account of increase in sales of passenger vehicles. For Q1FY2017 (provisionals), the operating income stood at Rs.24.10 cr.

#### Weaknesses

- **Below average financial risk profile**

The financial risk profile is below average marked by low net worth of Rs.2.47 cr and gearing (debt-to-equity ratio) at 3.79 times as on March 31, 2016. The interest coverage ratio (ICR) stands at 1.48 times for FY2016. Further, the liquidity profile is stretched as it continues to fully utilise its working capital limits.

- **Declining profitability margins**

In FY2015, the EBITDA stood at 9.00 per cent which declined to 6.09 per cent in FY2016 due to increase in promotion and selling expenses as a percentage of sales. The PAT margin was 0.88 per cent in FY2015 which declined to 0.38 per cent in FY2016.

- **Presence in the highly cyclical industry**

The company is exposed to cyclical in the auto dealership industry with large number of organised and unorganised players.

#### Analytical Approach

SMERA has considered the standalone business and financial risk profiles of MMPL while arriving at the rating.

### Outlook: Stable

SMERA believes that MMPL will continue to maintain a stable outlook and benefit over the medium term from its experienced management. The outlook may be revised to Positive if the scale of operations increases substantially while maintaining operating profitability and registering improvement in its financial risk profile. Conversely, the outlook may be revised to Negative if the company fails to achieve scalability amidst intensifying competition in its area of operations or if the financial risk profile deteriorates owing to higher-than-expected increase in debt-funded working capital requirements.
