### Rating Rationale

Acuite has Downgraded the long term rating to '**ACUITE D (read as ACUITE D)**' from '**ACUITE B+ (read as ACUITE B plus)**' on the Rs. 15.00 crore bank facilities of Avmark Polymers Private Limited (APPL). The rating continues to be flagged as "Issuer Not-Cooperating" and is downgraded on account of information risk.

The rating continues to be an indicative rating. The downgrade is based on the publicly available information.

The downgrade is on the account of the suit filed against the company as mentioned in the defaulter list published by CIBIL

### About the Company

The Kanpur-based APPL, promoted by Mr. Gaurav Agarwal, Saurabh Agarwal and Mr. Prateek Arora in 2013, is engaged in the production of tarpaulin.

### Non-cooperation by the issuer/borrower:

Acuite has been requesting for data, information and undertakings from the rated entity for conducting surveillance & review of the rating. However, the issuer / borrower failed to submit such information before the due date. Acuite believes that information risk is a critical component in such ratings, and noncooperation by the issuer along with an unwillingness to provide information could be a sign of potential deterioration in its overall credit quality. This rating is, therefore, being flagged as "Issuer not-cooperating", in line with prevailing SEBI regulations and Acuite's policies.

### Limitation regarding information availability:

The rating is based on information available from sources other than the issuer / borrower (in the absence of information provided by the issuer / borrower). Acuite has endeavoured to gather information about the entity / industry from the public domain. Therefore, Acuite cautions lenders and investors regarding the use of such information, on which the indicative credit rating is based.

### Note on Complexity Levels of the Rated Instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuite' s categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk.
