The revenue has dropped on account of decline in price of spices and pulses.

- **Working capital intensive operations**

STC's operations are working capital intensive in nature marked by high Gross Current Assets (GCA) of 207 days in FY2019 (Provisional) from 193 days in FY2018. The operating margins of the firm are highly depended on raw material prices. Raw material accounts to around 90 per cent of the total cost. Further, raw material prices depend on various factors such as agro-climatic conditions and government intervention to balance demand and supply for ensuring optimum availability at fair prices.

**Rating Sensitivities**

- Elongated working capital cycle.

**Material Covenants**

None

**Liquidity Position- Adequate**

The firm has adequate liquidity marked by moderate net cash accruals to its maturing debt obligations. The firm generated cash accruals of Rs. 0.31 crore for FY2019 (Provisional) while its maturing debt obligations were nil for the same period. The cash accruals of the firm are estimated to remain in the range of around Rs. 0.36 crore to Rs. 0.47 crore during 2020-22 against nil repayment obligation. Acuite believes that the liquidity of the firm is likely to remain moderate over the medium term on account of moderate cash accrual against no major debt repayments over the medium term.

**Outlook: Stable**

Acuite believes that STC will maintain a 'Stable' business risk profile on account of its established operational track record and reputed clientele. The outlook may be revised to 'Positive' in case STC is able to achieve significant growth in revenue along with improvement in profitability and significant improvement in financial risk profile. The outlook may be revised to 'Negative' in case STC reports deterioration in the working capital cycle or stretched liquidity position.
