## Rating Rationale

Acuité has reaffirmed the long term rating of '**ACUITE BBB+**' (read as **ACUITE triple B plus**) and short term rating of '**ACUITE A2**' (read as **ACUITE A two**) on the Rs. 59.39 crore bank facilities of Oasis Overseas Exports Private Limited (OEPL). The outlook is '**Stable**'.

### Rationale for rating reaffirmation

The revision in rating is on account of better than expected operating performance of Oasis Group indicated by improvement in operating revenues of Rs. 1910.52 Cr in FY2021 (Prov.) as against Rs. 1,755.98 Cr in FY2020. The group has generated a revenue of Rs. 531.84 Cr. in Q1 FY2021 and has an order book position of Rs.207.96, thereby giving healthy revenues visibility for FY2022. The company has achieved operating profit margin of 7.96 per cent in FY2021 (Prov.) improved from 7.54 per cent in previous year and net profit margin of 3.15 per cent in FY2021 (Prov.) as against 2.55 per cent in previous year. The rating assigned also factors in healthy financial risk profile of the company marked by low gearing of 0.60 times as on 31<sup>st</sup> March 2021 (Prov.) and total outside liabilities to total net worth (TOL/TNW) of 1.20 times as on 31<sup>st</sup> March 2021 (Prov.), healthy net worth at Rs. 529.32 Cr as on 31<sup>st</sup> March 2021 (Prov.) and moderate debt-coverage indicators with Interest Coverage Ratio (ICR) of 3.84 times. The group currently has production capacity of 490 KLPD and has further enhanced the capacity by 180 KLPD. This increase in ethanol capacity will help grow revenues in the near future due to push for higher ethanol blending. Further, the rating also takes into account the extensive experience of management of around three decades in the liquor industry. The rating is constrained on account of working capital intensive nature of industry and highly regulated nature of liquor industry. Going forward, the ability of the company to further sustain its scale of operations along with the effective management of its working capital cycle and financial risk profile would be the key rating sensitivities

- **Healthy financial risk profile**

The financial risk profile of group stood healthy marked by healthy net worth, comfortable gearing and healthy coverage indicators. The tangible net worth of OG stood healthy at around Rs. 529.32 crores as on 31 March, 2021 (Provisional) as against Rs. 460.66 crores as on 31 March, 2019 on the back of healthy accretion to reserves, which in turn is a result of healthy profitability levels maintained by the group over the years. The group has followed a conservative financial policy in the past, which is reflected by current gearing (debt-to-equity) stands at 0.64 times as on 31 March, 2021 (Provisional) and 0.75 times in the previous year. The gearing levels of the group have remained in the above mentioned range attributing to the minimal capital expenditure incurred towards the acquisition of latest machinery and expansion of the installed capacities. However, in current year due to re-structuring of capital in one of the company, in which unsecured loans from promoters were replaced by term loan of Rs. 70.00 Cr. The total outside liabilities to total net worth (TOL/TNW) ratio stands at 1.20 times as on 31 March, 2021 (Provisional) and 1.57 times as on 31 March, 2020. ### **Weaknesses**

#### • **Intensive working capital operations**

Oasis group operates in working capital intensive nature of operations marked by gross current assets (GCA) of 143 days for FY2021 (Prov.) as against 157 days for FY2020. The improvement is majorly on account of change in inventory days of 46 days as on 31 March 2021 (Prov.) as against 60 days in the previous year. Further, debtors' days stood improved at 61 days as on 31 March 2020 as against 64 days in previous year. The combined fund-based working capital limits are utilized at an average of 82.24 percent in the last nine months

Acuite believes that the working capital requirements will continue to remain intensive over the medium term

#### • **Exposure to heavy regulatory risk**

The Indian alcohol industry is highly regulated at almost every stage in the value chain. Moreover, every state has its set of regulations with respect to distribution and retail channels, registration, taxation, and pricing of alcohol. The industry is expected to remain highly regulated by the government going forward, exposing the business risk profile to adverse regulatory changes. Furthermore, players within the industry are susceptible to high excise duties.

### **Rating Sensitivity**

- Sustained growth in operating performance with improvement in profitability and financial risk profile
- Slowdown in industry leading to inventory pile up.

### **Material Covenants**

The outlook may be revised to 'Positive' in case the group registers higher-than-expected growth in its revenues and profitability while maintaining its liquidity position. Conversely, the outlook may be revised to 'Negative' in case the group registers lower-than-expected growth in revenues and profitability or in case of deterioration in the group's financial risk profile or significant elongation in the working capital cycle.
