### Rationale for Rating and Revision in Outlook

The rating on OG takes into account the sustained growth in the operating income, stability in operating margins, experienced management, long track record of operations and healthy financial risk profile. The above factors are underpinned by intensive working capital cycle and volatile raw material prices.

The outlook of the group is revised from positive to stable on account of lower than envisaged operating performance of the group and cost overrun in one of the ethanol Plant. The group missed its's projection as Ethanol unit of MIPL remained non-operational due to ongoing protest wherein allegation is levelled against MIPL for contaminating the ground water (Matter is pending with Hon'ble High Court). Further SCOD for MIPL's 2<sup>nd</sup> Ethanol Unit located in Shahazhan Pur, Uttar Pradesh could not be achieved resulting into cost overrun and an extension in SCOD. The cost overrun was met by the internal sources of the group.

Furthermore, players within the industry are susceptible to high excise duties.
