

## Press Release

### Batliboi Environmental Engineering Limited

September 24, 2020

### Rating Upgraded and Reaffirmed

<b>Total Bank Facilities Rated*</b>	Rs.25.25 Cr.
<b>Long Term Rating</b>	ACUITE B+ / Outlook: Stable (Upgraded from ACUITE B/Stable)
<b>Short Term Rating</b>	ACUITE A4 (Reaffirmed)

\* Refer Annexure for details

### Rating Rationale

Acuite has upgraded the long-term rating to '**ACUITE B+**' (read as **ACUITE B plus**) from '**ACUITE B**' (read as **ACUITE B**) and reaffirmed the short-term rating at '**ACUITE A4**' (read as **ACUITE A four**) on the Rs.25.25 crore bank facilities of Batliboi Environmental Engineering Limited. The outlook is '**Stable**'.

The upgrade in the rating is on account of improvement in the overall business risk profile, marked by growth in operating income along with operating and net profitability margins. The rating also factors the established track record of operations and vast experience of the promoters. Further, the upgrade also factors the established brand name in the market, especially with its association with renowned client portfolio, which includes JSW Steel, Thermodyne Technologies Private Limited, to name a few.

### About the Company

Mumbai-based, BEEL was incorporated in 1959 and is engaged in the manufacturing and trading of air pollution control equipment's and industrial fans. The directors Mr. Kaushik Kantilal Shah, Mr. Parmeshwaran Krishnan Nair and Mr. Kabir Nirmal Bhogilal, have more than two decades of experience in the said line of business.

### Analytical Approach

Acuite has taken the standalone view of the business and financial risk profile of BEEL to arrive at the rating.

### Key Rating Drivers

#### Strengths

- **Experience of promoters and established track record of operations along with reputed clientele**

BEEL, incorporated in 1959 is in the aforementioned line of business since more than 2 decades now and the management has built strong relations with its customers and suppliers that has helped them report an overall turnover of Rs. 60.63 Cr in FY2020 (Prov). The Company also exports to nations like Uganda, Kenya, Sri Lanka, Malaysia, Nepal, Philippines, Indonesia and Bangladesh although exports account for less than 5 percent of the total turnover. The Company has reported a turnover of Rs.21.32 Cr in 5MFY2021; the sales remain impacted on account of the outbreak of COVID-19 and subsequent lockdown. Acuite believes that the business is expected to benefit from its established presence in the aforementioned industry and the director's demonstrated ability; however, operations are expected to remain impacted in the near term due to slowdown of the market, leading to reduced demand caused by outbreak of COVID-19.

- **Government support towards curbing air pollution**

Pollution control norms laid out of by the government are getting more stringent every year. Protection of the environment against any kind of pollution is one of the key focus areas in today's environmentally conscious world. This is likely to help BEEL in generating more sales for pollution control equipment's and expand their business by adding more clients to their portfolio.

#### Weaknesses

- **Working capital intensive operations**

BEEL's operations are working capital intensive as highlighted by GCA days of 214 days in FY2020 (Prov) against 215 days in FY2019 mainly influenced due to high debtor days. The debtor's days stood at 167 days in FY2020 (Prov) against 182 days in FY2019 due to retention money held with the customers for a long period of time till

the project is completed. The inventory days stood at 11 days in FY2020 (Prov) against 6 days in FY2019. The invoice was raised for the goods, but the company was unable to bill & dispatch the goods in March, 2020 and the same was done in July, 2020 due to the outbreak of COVID-19 and subsequent lockdown in the country. However, the working capital limits remained utilized moderately at ~22 percent through the last four months ending in July 2020. Acuite believes that the working capital operations are expected to remain at the same level with respect to the nature of the business cycle and will remain a key rating sensitivity factor.

#### • Weak financial risk profile

BEEL's financial risk profile is weak marked by high gearing (debt to equity ratio), high total outside liabilities to total net worth (TOL/TNW), although partly supported by moderate debt protection metrics. The gearing has stood at 2.50 times as on 31<sup>st</sup> March, 2020 (Prov) against 4.27 times as on 31<sup>st</sup> March, 2019. TOL/TNW stood high at 25.15 times as on 31<sup>st</sup> March, 2020 (Prov) against 36.69 times as on 31<sup>st</sup> March, 2019. The tangible net worth of the company stood modest at Rs.1.58 Cr as on 31<sup>st</sup> March, 2020 (Prov) against Rs.1.03 Cr as on 31<sup>st</sup> March, 2019.

Debt protection metrics of interest coverage ratio and net cash accruals to total debt are at 1.45 times and 0.12 times, respectively for FY2020 (Prov). Acuite believes that the financial risk profile of the company is expected to remain weak in the medium term on account of modest net worth and moderate debt protection metrics.

#### Rating Sensitivities

- Improvement in the scale of operations with improvement in its operating income
- Any stretch in working capital operations leading to the deterioration of its financial risk profile and liquidity

#### Material Covenants

None

#### Liquidity: Weak

BEEL has weak liquidity reflected by working capital-intensive operations evident from GCA days of 214 days in FY2020 (Prov) against 215 days in FY2019. The company has reported cash accruals of Rs.0.64 Cr in FY2020 (Prov.) against moderate long-term repaying obligations. It is expected to generate cash accruals in the range of Rs.0.48 Cr to Rs.0.99 Cr over the medium term, against moderate repayment obligations. The working capital limits remain utilized at ~22 per cent through four months ending July - 2020. The company has unencumbered cash and bank balances of Rs.1.89 Cr as on 31<sup>st</sup> March, 2020 (Prov). The current ratio stood at 1.07 times as on 31<sup>st</sup> March, 2020 (Prov). The company has availed COVID facility of Rs.0.20 Cr term loan which is sanctioned but is yet to be disbursed. Acuite believes that liquidity profile is expected to remain weak on account of working capital-intensive operations and low net cash accruals against moderate repayment obligations for the medium term.

#### Outlook: Stable

Acuite believes that BEEL will maintain 'Stable' outlook in the medium term on account of the long track record of operations and experienced management in the said industry. The outlook may be revised to 'Positive' if the company registers higher than expected growth in revenues and profitability while registering an improvement in its liquidity position and working capital cycle. Conversely, the outlook may be revised to 'Negative' if in case of any further deterioration in the financial risk profile leading to further deterioration of the liquidity profile.

#### About the Rated Entity - Key Financials

	Unit	FY20 (Provisional)	FY19 (Actual)
Operating Income	Rs. Cr.	60.63	53.87
