Further, the rating continues to draw comfort from the experienced management, improving debt protection metrics and profitability margin.

Going forward, Acuite believes that the company's ability to improve its net worth along with debt protection metrics will remain key sensitivity.

### • Exposed to fluctuation in raw material prices

The major raw material of the company is copper scrap. The prices of the same are fluctuating in nature therefore the operating profit margins of the company is susceptible to raw material price fluctuation.

## Outlook: Stable

Acuite believes that the outlook will remain 'Stable' over the medium term on account of its promoter's extensive experience and improving profitability margins. The outlook may be revised to 'Positive' in case the company maintains its financial risk profile and working capital operations while effectively managing its liquidity position. Conversely, the outlook may be revised to 'Negative' in case of decline in net cash accruals, deterioration in the financial and liquidity profile due to higher than envisaged working capital requirements.
