Rating Rationale

Acuite has reaffirmed the long term rating of '**ACUITE B+**' (read as **ACUITE B plus**) and the short-term rating of '**ACUITE A4**' (read as **ACUITE A four**) on the Rs. 11.00 crore bank facilities of Construction Technique (CT). The rating continues to be flagged as "Issuer NotCooperating" and is based on the best available information.

About the Company

Maharashtra based - Construction Technique (CT) was established in 1992 as a partnership firm by Mr. Harish Ruparel and Mr. Bipin Fafadia. The firm undertakes construction of factories and residential and commercial buildings, along with restoration of heritage monuments. The firm has executed several projects related to restoration of heritage monuments at Punjab Heritage Tourism, Archaeological Department of Nasik, and Central Public works department – Shimla.

Non-cooperation by the issuer/borrower:

Acuite has been requesting for data, information and undertakings from the rated entity for conducting surveillance & review of the rating. However, the issuer/borrower failed to submit such information before the due date.

Acuite believes that information risk is a critical component in such ratings, and noncooperation by the issuer along with an unwillingness to provide information could be a sign of potential deterioration in its overall credit quality.

This rating is, therefore, being flagged as "Issuer not-cooperating", in line with prevailing SEBI regulations and Acuite's policies.

Limitation regarding information availability:

The rating is based on information available from sources other than the issuer/borrower (in the absence of information provided by the issuer/borrower). Acuite endeavoured to gather information about the entity/industry from the public domain. Therefore, Acuite cautions lenders and investors regarding the use of such information, on which the indicative credit rating is based.

Note on Complexity Levels of the Rated Instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuité's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk.
