

Press Release

Ashoka Buildcon Limited

July 30, 2019

Rating Reaffirmed

Total Bank Facilities Rated*	Rs.6306.00 Cr.
Commercial Paper	Rs.200.00 Cr.
Long Term Rating	ACUITE AA / Outlook: Stable (Reaffirmed)
Short Term Rating	ACUITE A1+ (Reaffirmed)

* Refer Annexure for details

Rating Rationale

Acuite has reaffirmed the long-term rating of '**ACUITE AA**' (read as **ACUITE double A**) and short-term rating to '**ACUITE A1+**' (read as **ACUITE A one plus**) to the Rs. 6306.00 crore bank facilities of ASHOKA BUILDCON LIMITED (ABL). The outlook is '**Stable**'.

Also, Acuite has reaffirmed the short term rating of '**ACUITE A1+**' (read as **ACUITE A one plus**) on the Rs. 200.00 Cr. commercial paper of ABL.

ABL, incorporated in 1993, is a Nashik-based company that undertakes Engineering, Procurement and Construction (EPC) contracts for the road and power sectors. The company is also a leading player in the BOT (Build Own, Transfer) segment. ABL has recently entered the CGD (City Gas Distribution) segment. The group is primarily engaged in two businesses - EPC business for roads and power distribution projects and development of roads and highways on Build, Operate and Transfer (BOT) and also through its subsidiary Ashoka Concessions Limited (ACL), a 66 per cent subsidiary of ABL. ABL has an equity stake in 18 direct and 12 indirect subsidiaries, mostly SPVs set up for BOT projects.

ABL is listed on BSE and NSE. The day-to-day operations are led by the Chairman, Mr. Ashok Motilal Katariya and Managing Director, Mr. Satish Dhondulal Parakh. The management of the company has a long track record in the infrastructure sector.

Analytical Approach

Acuite has considered the standalone business and financial risk profiles of ABL to arrive at this rating while also taking into account any support that may need to be provided to its subsidiaries.

Key Rating Drivers

Strengths

• Established position in EPC and BOT Road Segments

ABL is engaged in two businesses - EPC business for roads and power distribution projects and development of roads and highways on Build, Operate and Transfer (BOT) and also through its subsidiary Ashoka Concessions Limited. ABL has an established track record of more than two decades in executing EPC contracts. The company has constructed more than 10,000 lane kilometers of road since inception. The Ashoka group (ABL & ACL) has currently 21 projects of which 12 are currently operational. The group also has 2 foot over bridges in Mumbai from which it generates advertising revenue. Of the 12 operational projects, 7 are SPVs housed in ACL, and the balance projects are under ABL. ABL handles EPC contracts for all projects and are also responsible for the Operations and Maintenance (O&M) of road projects in ABL and ACL. The company is engaged in modernizing and setting up of power distribution lines for Maharashtra State Electricity Distribution Company, North Bihar Power Distribution Company Limited, Tamil Nadu Electricity Board and CPDCL.

Acuite believes that ABL's established position in the EPC segment of roads power transmission and distribution along with BOT-project execution capabilities will support its business risk profile over to near to medium term.

- **Healthy revenue visibility**

ABL is engaged in the execution of Engineering, Procurement and Construction (EPC) contracts and Build Operate Transfer (BOT) road projects for over two decades. ABL had an order book of Rs.8394.30 Cr. as on March 2019 that includes BOT road projects worth Rs.4620.00 Cr., EPC road projects worth Rs.2124.20 Cr., EPC Power Transmission and Distribution worth Rs.914.00 Cr, EPC Railways worth Rs. 720.00 Cr. And City Gas Distribution of Rs. 16.10 Cr. Road construction has healthy prospects on account of government policies and initiatives through NHAI (National Highway Authority of India).

Acuite believes that ABL will benefit from its established position in the EPC and roads segment coupled with the overall thrust on infrastructure development by the government.

- **Healthy financial risk profile**

The financial risk profile of ABL is healthy marked by healthy net worth, low gearing and healthy debt protection metrics. The tangible networth increased to Rs.2212.03 crore as on 31 March, 2019 as against Rs.1926.28 crore as on 31 March, 2018 on account of capital infusion by the promoters and moderate accretion to reserves.

The company follows conservative leverage policy as reflected by its peak gearing of 0.36 times as on March 31, 2019. The total debt of Rs. 788.31 crore includes term loans from banks of Rs. 394.49 crore, working capital funds of Rs. 325.46 crore and unsecured loans of Rs. 68.36 crore. Since the company also receives support from trade credit and mobilization advances, its dependence on the banking system for working capital limits is moderate. The gearing is expected to remain low in future due to expectations of a healthy net worth.

In FY2019, net cash accruals increased to Rs.363.49 crore as against Rs.272.16 crore in FY2018. The net cash accruals have increased on account of increase in net profits. The improving profitability coupled with low gearing levels has resulted in healthy debt protection metrics, with interest coverage ratio (ICR) of 7.01 times (PY: 8.02 times) and NCA/TD of 0.46 times for FY2019. The decline in the ICR was on account of significant increase in borrowings in FY2019 over FY2019. Acuite expects the coverage indicators of ABL to remain healthy on account of expansion of profitability margins.

ACL's 34 per cent stake is held by SBI Macquarie Infrastructure Management Private Limited. Based on the discussion with the management, Acuite understands that if SBI Macquarie decides to exit, it will be through the induction of a new investor or any other exit option. However the same is not expected to have an impact on the financial risk profile or the cash flows of ABL.

Weaknesses

- **Exposure of ABL to timely execution of EPC contracts and to risks associated with BOT projects**

ABL is exposed to risks such as delays in receipt of approvals in the infrastructure segment, which may impact operational cash flows. The timely flow of orders and their execution are critical to the maintenance of a steady revenue growth. ABL is also required to support the projects till the projects reach optimal utilization.

The cash flows of a toll based project are dependent on traffic volumes which in turn are largely influenced by the level of economic activity in and around the area of operation. In the event of a project's cash flows being insufficient to meet its debt servicing commitments/maintenance commitments, the support would be required to be extended from either ABL or ACL. For instance the Sambalpur Baragarh Road Tollway is presently dependent on parent (ACL) support to meet its operational/financial commitments. Additionally, lower than expected traffic volumes due to prolonged slowdown in the economic activity due to events such as mining bans etc. may also impact cash flows causing cash flow mismatches. In such cases, support may be required to be extended to the SPVs.

• Working Capital Intensive Operations

The operations are working capital intensive due to long construction periods. Typically, the company takes about 30 months to complete road projects. The debtors for FY2019 stood at 148 days with inventory of 17 days as compared to debtors of 151 days for FY2018 and inventory of 25 days for the period. The Gross Current Assets stood at 306 in FY2019 as against 303 in FY2018. ABL's ability to manage its working capital requirements in an efficient way while improving collection efficiency within the envisaged time frame will remain critical from the credit perspective.

Liquidity Position

ABL has strong liquidity marked by healthy net cash accruals to its maturing debt obligations. The company generated cash accruals of Rs.164.65-363.49 crore during the four years through 2015-18, while its maturing debt obligations were in the range of Rs.23.69 to 170.65 crore over the same period. The cash accruals of the company are estimated to remain around Rs.403.94-457.84 crore during 2020-22 while its repayment obligation are estimated to be around Rs. 57.71 Crore. The company's operations are working capital intensive as marked by gross current asset (GCA) days of 306 in FY 2018. However, the reliance on working capital borrowings is low. The current ratio of the company stand moderate at 1.44 times as on March 31, 2019. Acuite believes that the liquidity of the company is likely to remain strong over the medium term on account of healthy cash accrual and no major repayments over the medium term.

Outlook: Stable

Acuite believes that ABL will maintain a stable credit profile on the back of its established presence in the infrastructure sector and the increasing infrastructure spending in the economy. The outlook may be revised to 'Positive' in case of sufficiently higher than expected growth in accruals and a further strengthening in business risk profile. Conversely, the outlook may be revised to 'Negative' in case of slowdown in the flow of orders, elongation of working capital cycle, significant support required to be extended to its subsidiaries.
