## Comfortable financial risk profile

The financial risk profile of the group is marked by healthy net worth, modest gearing and comfortable debt protection measures. The net worth levels of the group stood at around Rs.174.93 crore on 31 March, 2017 as against Rs.126.70 crore on 31 March, 2016. The net worth of the group includes unsecured loans from directors/ promoters and of Rs.88.16 crore as on 31 March, 2017 compared to Rs.71.33 crore in FY2016. The same is subordinated to bank debt and hence SMERA has treated these as quasi equity. The

### Weakness

#### Inherent cyclical in the steel industry

The group's revenue and profitability are susceptibility to the inherent cyclical in the steel industry and volatility in steel prices.

#### Intense competition

Steel is a highly competitive industry due to low entry barriers which results in intense competition from both the organized as well as unorganized players in the industry.

#### Analytical approach:

While assigning the rating, SMERA has taken into account the consolidated operational and financial performance of K J International, K J Steel Rolling Mills, Arora Iron & Steel Rolling Mills, Jyoti Industries (Unit II) and Bhawani Shanker Castings Private Limited. The consolidation is in view of common management, common manufacturing facilities as well as significant operational and financial linkages. The group is herein referred to as KJ Group.

#### Outlook: Stable

SMERA believes the group will maintain a stable business risk profile in the medium term on account of its experienced management and long track of operation. The outlook may be revised to 'Positive' in case the group registers higher-than-expected growth in revenues and net cash accruals while maintaining healthy debt protection metrics. Conversely, the outlook may be revised to 'Negative' in case of lower-than-expected revenue or profitability or any further debt-funded capital expenditure, weakening the financial risk profile.
