### Analytical Approach

Acuite has considered the standalone business and financial risk profile of DHAR to arrive at the rating.

## Key Rating Drivers

### Strengths

#### • Experienced management

The company was established in 1991 and has operational track record of nearly three years. The promoter possess nearly three decades of experience in coal industry and is ably assisted by an experienced second line of management.

Acuite believes that DHAR will continue to benefit from its management's extensive experience which will help the firm to maintain long standing relations with its customers and suppliers.

#### • Moderate financial risk profile

The financial risk profile is moderate marked by tangible net worth of Rs.21.53 crore as on 31 March, 2018 as against Rs.15.16 crore in the previous year. The improvement in net worth is on account of accretion of reserves. The gearing stood low at 0.26 times as on 31 March, 2018 as against 0.33 times in the previous year. The total debt of Rs.5.64 crore entirely comprises of unsecured loan from promoters. Further, the company avails Non-fund based exposure of Rs.50.00 crore which are seen under creditors as they are LC backed. Going forward, Acuite believes that the company's ability to improve its net worth along with debt protection metrics will remain key sensitivity.

### Weaknesses

#### • Working capital intensive operations

The operations are working capital intensive marked by high Gross Current Assets (GCA) of 116 days in FY2018 as compared to 72 days in FY2017. The GCA days are mainly dominated by high collection

period of 79 days in FY2018 compared to 44 days in FY2017. The inventory holding period stood comfortable at 6 days in FY2018 compared to 9 days in FY2017.

Acuite believes that the efficient working capital management will be crucial in order to maintain a stable credit profile.

#### • Elongated creditor days

DHAR's creditor days stood at 114 days in FY2018 as against 51 days in FY2017 and 19 days in FY2016. Creditors in FY2018 stood at Rs.50.11 crore which include Rs.47.10 crore for suppliers which are LC backed as against Rs.21.88 crore in FY2017 which includes Rs. 21.05 crore for suppliers which are LC backed.

#### • Susceptibility to fluctuations in demand and intense competition

The major users of coal belong to steel, power and cement industry and hence, the demand for coal depends on these industries. Lower demand from these industries will impact the overall performance of the company. Further, it is exposed to intense competition from many small and medium sized players.

#### Outlook: Stable

Acuite believes that DHAR's outlook will remain 'Stable' and the company will benefit over the medium term from its experienced management and moderate financial risk profile. The outlook may be revised to 'Positive' in case of higher than expected growth in revenues while maintaining its working capital. The outlook may be revised to 'Negative' in case of steep decline in revenues and profitability or higher than envisaged debt funded capex or working capital requirements deteriorating financial risk profile and liquidity position.
