Analytical Approach

Key Rating Drivers

Strengths

Established track record of operations along with experienced management

Nagpur based, KKJPL was established in 1960; thus, the company has an operational track record of over six decades in Gems & Jewellery industry. At present, the company's day to day operation is managed by the third generation of the Kothari family. The directors, Mr. Chandra S. Kothari, Mr. Pradeep M. Kothari, Ms. Shivani Sadaphal and Mr. Karan N. Kothari have an experience of around three decades in the aforementioned line of business. The long track record of operations along with extensive experience of the promoters has helped the

company maintain a stable business risk profile.

Comfortable operating performance

The revenue of the company stood at Rs.554.12 Cr. in FY2024 registering a growth of 11.82 percent YoY compared to revenue of Rs.495.55 Cr. in FY2023. The 8MFY25 revenue stood at Rs.500 crores. The operating profit margin of the company improved to 3.84% in FY2024 as against 3.54% in FY2023.

Acuite believes that the operating performance of the company will remain steady on the back of stable business risk profile.

Change in business dynamics

KKJPL has launched its application-based software, enabling them to connect with a wide range of customers and allowing customer to invest in gold saving schemes. Additionally, the company has joined the IIBX bullion exchange, allowing them to procure fine gold directly from IIBX instead of through bullion dealers which has resulted in a cost reduction of 1-2%. The company leverages competitive international rates to procure gold directly from the global market. This strategy allows it to bypass the chain of bullion suppliers and avoid middlemen, thereby reducing additional transportation and security costs that would otherwise be incurred if purchasing from other bullion dealers.

Moderate Financial Risk Profile

The financial risk profile of the company is moderate marked by moderate net worth, gearing levels, and moderate debt protection metrics. The tangible net worth of the company improved and stood at Rs.73.36 Cr. as on March 31, 2024 as against Rs.67.33 Cr. as on March 31, 2023. The company follows a moderate leverage policy as reflected in its gearing level of 1.71 times as on March 31, 2024 as against 1.80 times as on March 31, 2023. The total outside liabilities to total net worth (TOL/TNW) stood at 3.07 times as on March 31, 2024 as against 2.99 times as on March 31, 2023. The debt service coverage ratio (DSCR) stood at 1.74 times in FY2024 as against 1.46 times in FY2023.

Acuite believes that the financial risk profile of the company is expected to remain moderate in the absence of any major debt funded capex in near to medium term.

Weaknesses

Working Capital Intensive Nature of Operations

The working capital operations of the company are intensive in nature marked by moderate gross current asset (GCA) days and working capital utilisation. The GCA days of the company stood at 185 days in FY2024 as against 186 days in FY2023. The inventory days improved and stood at 144 days in FY2024 as against 179 days in FY2023. The debtor days stood at 30 days in FY2024 against 6 days in FY2023. The creditor days stood at 58 days in FY2024 as against 51 days in FY2023. The average working capital utilisation of the company stood higher at 89% for last eight months ended November 2024. Acuite believes operations of the company shall continue to remain intensive considering its nature of operations.

Susceptibility to regulatory framework and intense competition in jewellery Industry

Government's regulations aimed towards increasing transparency in the gold jewellery industry through mandatory PAN disclosures for transactions above Rs.2.00 lakh and compulsory hallmarking impacting the gold jewellery demand could hinder near - term growth prospects of the company. Despite its longstanding presence in the business, KKJPL faces intense competition from the national players, such as Titan Company Limited, Tribhovandas Bhimji Zaveri Limited, Kalyan Jewellers India Limited, and other regional as well as pan-India players. Further, the fragmented nature of the industry has resulted in strong competitive pressures, thereby squeezing players' margins.

- Consistent growth in revenue with sustainability of the profitability margins.
- Any deterioration of its financial risk profile and liquidity position.
- Any stretch in the working capital cycle leading to deterioration in debt protection.
