#### • Volatility in tea prices and agro climatic conditions

Besides, the agro climatic conditions also have a bearing on tea, impacting profit margins. The same can be observed in previous years; however, in FY2021, the price of tea is higher owing to a shortage in supply due to the impact of COVID-19. Thus resulting in higher margins for the current year.

#### Rating Sensitivities

- Improving scale of operations
- Working capital intensive operations
- Volatility in tea prices and detrition in liquidity profile

#### Outlook: Stable

Acuite believes that BTCL will maintain a Stable outlook and continue to benefit over the medium term from its experienced management. The outlook may be revised to 'Positive' in case the company registers higher-than-expected growth in revenues while achieving sustained improvement in profit margins and improving its working capital management. Conversely, the outlook may be revised to 'Negative' in case of failure in achieving the projected revenues leading to a fall in the margins or deterioration in the financial risk profile.
