Weaknesses

• Working Capital Intensity

The working capital cycle of the group has deteriorated in FY2018 as compared to FY2017 marked by high GCA of 247 days in FY2018 (PY: 167 days). GCA has increased majorly on account of increase in receivable days to 159 in FY2018 (PY: 74 days). Receivables increased in FY2018 majorly on account of delay in realization of export bills from few customers. For FY2019 the receivable days improved to 44 days due to better realization from the export receivables. The group was facing issues with discounting the export bills and hence it has availed FBN facility of Rs. 14.00 crore from banks. In order to further reduce the debtor days the group has started with advance payment terms for domestic market.

The inventory holding period remained at 46 days in FY2018 (PY: 45 days). In FY2019 it stood at 31 days. Further due to delay in receivables, the suppliers were also stretched at 127 days in FY2018 (PY: 49 days). The average utilization of the bank limits stood at 94% for the last six months ended March, 2019.

• Declining profitability trend

The margins registered a decline to 6.57 per cent (Provisional) in FY2019 from 7.34 per cent in FY2018, 10.58 per cent in FY2017 and 10.23 per cent in FY2016. The operating profitability declined on account of significant increase in cotton prices and also due to intense competition which is not completely being passed to the customers. The net profitability margins declined to 0.22 per cent in FY2018 (PY: 1.96%). The profitability declined on account of increase in depreciation cost in FY2018 over FY2017 on account of Vaibhavlaxmi Spintex LLP being operational in FY2018 and also decline in operating profitability in FY2018. Further the net profitability margin of the group improved to 1.70 per cent for FY2019 (Provisional).

Liquidity Position

The group has adequate liquidity marked by healthy net cash accruals to its maturing debt obligations. The company generated cash accruals of Rs.10.48 to 31.77 crore during the four years through 2016-19, while its maturing debt obligations were in the range of Rs.6.62 to 12.93 crore over the same period. The cash accruals of the company are estimated to remain around Rs.32.50 to 49.41 crore during 2010-22 while its repayment obligation are estimated to be around Rs. 16.10 Crore. The company's operations are working capital intensive as marked by gross current asset (GCA) days of 101 in FY 2019. This has led to moderate reliance on working capital borrowings, the cash credit limit in the company remains utilized at ~94 percent during the last 6 months period ended March 2019. The company maintains unencumbered cash and bank balances of Rs.1.32 crore as on March 31, 2019. The current ratio of the company stand healthy at 1.55 times as on March 31, 2019. Outlook: Stable

Acuite believes that the group will maintain a 'Stable' outlook over the medium term owing to its experienced management. The outlook may be revised to 'Positive' in case the company registers significant growth in its revenue and profitability while maintaining comfortable liquidity position. Conversely, the outlook may be revised to 'Negative' in case of stretched working capital cycle or deterioration in its financial risk profile due to higher than expected debt funded capex plan.
