### Key Rating Drivers

#### Strengths

- Experienced management**

Incorporated in 1997, ATPL is led by Mr. Ashwani Mahajan (Managing Director) and Mr. Sunil Mahajan (Technical Director) who have been associated with the steel industry for more than two decades. The extensive experience of the directors has led to established market presence of ATPL enabling it to build strong business ties with its suppliers and customers.

- Growth in scale of operations**

ATPL has reported operating income of Rs.209.57 crore for FY2018 (Provisional) which has improved from Rs.148.42 crore in FY2017 and Rs.148.31 crore in FY2016. This is mainly due to increase in production capacity. The operating margins stood at 9.51 percent in FY2018 (Provisional) as against 9.74 percent in FY2017. Profit after Tax (PAT) margin stood at 5.64 percent in FY2018 (Provisional) as against 1.75 percent in FY2017. This is mainly because of the profit from sale of fixed asset of Rs.8.49 crore in FY2018.

Acuite believes that going forward the scale of operations of the company will increase due to increase in production capacity.

- Moderate financial risk profile**

ATPL has moderate financial risk profile marked by tangible net worth of Rs.51.56 crore as on 31 March, 2018 (Provisional) as against Rs.39.74 crore as on 31 March, 2017. This is mainly due to accretion of reserves. The gearing (debt-equity) improved to 0.99 times as on 31 March, 2018 (Provisional) as against 1.52 times as on 31 March, 2017. The total debt of Rs.50.97 crore as on 31 March, 2018 (Provisional) comprises term loans of Rs.20.52 crore, unsecured loans of Rs.4.24 crore from directors and working capital borrowings of Rs.26.21 crore. Inventory holding period stood at 110 days in both FY2018 (Provisional) and FY2017. Collection period increased to 102 days in FY2018 (Provisional) as against 84 days in FY2017. Further, it had creditor days of 141 in FY2018 (Provisional) as against 146 days in FY2017. The company's liquidity profile is moderately stretched as its average working capital limit utilisation is ~80 percent in the last six months ended March 2018.

### • Competitive and fragmented industry

The company operates in a highly competitive ERW tube industry thereby putting pressure on the bargaining power. The performance of the company is also impacted by large number of players in the ERW pipe segment.

## Analytical Approach

Acuite has considered the standalone business and financial risk profiles of ATPL to arrive at the rating.

## Outlook: Stable

Acuite believes that ATPL will maintain a 'Stable' outlook in the medium term while benefitting from its experienced management, growth in operations and moderate financial risk profile. The outlook may be revised to 'Positive' if ATPL shows significant improvement in working capital operations with sustained revenue growth while maintaining profitability. Conversely, the outlook may be revised to 'Negative' in case of lower-than-expected growth in revenues and profitability or in-case of further deterioration in working capital cycle.
