Total Outstanding Quantum (Rs. Cr)	60.00	-	-
Total Withdrawn Quantum (Rs. Cr)	0.00	-	-

\*Refer Annexure for details

## Rating Rationale

Acuite has reaffirmed the long-term rating of '**ACUITE BB+**' (read as **ACUITE double B plus**) and the short-term rating of '**ACUITE A4+**' (read as **ACUITE A four plus**) on the Rs.60.00 Cr. bank facilities of Vivekanand Cotspin LLP (VCLLP). The outlook is '**Stable**'.

### Rationale for rating reaffirmation:

The rating reaffirmation draws comfort from the established business risk profile of the company while maintaining its top line performance in FY2021 albeit the impact of covid-19, improvement in the revenues in FY2022 & expected improvement going forward, moderate financial risk profile marked by moderate debt protection metrics, moderate working capital operations and adequate liquidity position marked by adequate cash accruals against moderate repayment obligations. The rating nonetheless remains constrained on account of fluctuations in margins and risk of capital withdrawal.

### About the Firm

Vivekanand Cotspin LLP (VCL) is a Gujarat-based entity established in 2015 and promoted by the Patel family. The entity is engaged in the business of cotton ginning and spinning with an installed capacity of 400 bales per day with average capacity utilization of up to 320 bales per day and an installed capacity of 25000 spindles with average utilization of 98 percent.

### About the Group

Vivekanand Group companies have been established since 1983. The group is involved in the manufacturing and marketing of cotton products both in the domestic market and the international market.

### Analytical Approach

### Extent of Consolidation

- Full Consolidation

### **Rationale for Consolidation or Parent / Group / Govt. Support**

Acuité has considered the consolidated view of the business and financial risk profiles of Ambica Cotseeds Limited (ACL), Vivekanand Industries (VI), and Vivekanand Cotspin LLP (VCL) to arrive at the rating. The consolidation is in the view of a common line of business, common management, and significant business and financial interlinkages between these entities. The group is herein referred to as Vivekanand Group (VG).

### **Key Rating Drivers**

#### **Strengths**

##### **>Established track record of operations supported by an experienced management**

VG entities were established in 1983 by Mr. Bharat Patel and Mr. Vishnu Patel. Both the partners have more than three decades of experience in the industry and continue to actively participate in the business; Mr. Nirav Patel is currently leading the group since 2008. Further, the operations of the group are based out of Mehsana, Gujarat, which is one of the major cotton producer states in the country.

Acuité believes that VG will continue to benefit from its proximity to its supplier base, promoters experience, and its established presence in the industry while improving the business risk profile in the near to medium term.

##### **>Moderate working capital cycle**

VG has a moderate working capital cycle on the back of improvement in the inventory holding period albeit stretch in the debtors' collection period, which has, in turn, affected its creditors' payment period during the FY2019-21 period. The inventory holding period improved to 21 days in FY2021 as against 25 days in FY2020 and 30 days in FY2019, while the debtors' collection period elongated to 45 days in FY2021 as against 29 days in FY2020 and 13 days in FY2019, and the creditors' payment consequently increased to 21 days in FY2021 as against 16 days in FY2020 and 6 days in FY2019. The Gross Current Asset (GCA) days has moderated on a Y-O-Y basis on account of the debtors' collection period, the higher Cash and Bank Balance held of Rs.6.24 Cr. as on March 31, 2021, as against Rs.0.41 Cr. as on March 31, 2020, has also contributed to the higher GCA. Working capital limits of VG Group entities on a consolidated basis are utilized at an average of ~70-80 percent for the 6-month period ended April, 2022.

Acuité believes that VG's ability to contain the further elongation in working capital in the near to medium term will be a key rating factor.

##### **Improvement in operating income albeit the impact of Covid-19**

VG's diversified customer profile in both domestic and international markets has helped the group improve its revenue profile marked by operating income of Rs.848.33 Cr. in FY2021 as against Rs.672.67 Cr. in FY2020 albeit the impact of covid-19. In the international market, the group markets its products in countries and regions such as Pakistan, China, Bangladesh, Indonesia, Vietnam, Thailand, Taiwan, Japan, Europe, and the USA to name a few. VG's operating income for FY2022 stood at Rs.929 crore as informed by the management.

#### **Weaknesses**

##### **>Moderation in the financial risk profile**

VG's financial risk profile has witnessed moderation marked by deterioration in gearing and coverage indicators albeit witnessing improvement in its tangible net worth on a Y-O-Y basis. The tangible net worth of VG strengthened to Rs.50.92 crore as on March 31, 2021, as against Rs.46.24 crore as on March 31, 2020, on the back of accretion to reserves. The Gearing (Debt to Equity) stood at 2.91 times as on March 31, 2021, as against 2.38 times as on March 31, 2020, and 1.69 times as on March 31, 2019; as the group increased its exposure to short-term fund-based working capital limits. The Total Outside Liabilities/Total Net Worth (TOL/TNW) has also increased to 3.88 times as on March 31, 2021, as against 3.12 times as on March 31, 2020, and 2.11 times as on March 31, 2019. VG's coverage indicators have witnessed moderation marked by Interest Coverage Ratio (ICR) of 1.63 times in FY2021 as against 1.91 times in FY2020 and 2.23 times in FY2019, while the Debt Service Coverage Ratio (DSCR) stood at 1.00 times (unity) in FY2021 as against 1.07 times in FY2020 and 1.27 times in FY2019.

Acuité believes that the performance of the gearing and coverage indicators will be a key rating factor in the near to medium term.

#### >Moderation in profitability indicators

VG's profitability indicators have witnessed deterioration consistently since FY2019 on the back of fluctuating raw material costs during the FY2019-21 period and a significant increase in its selling costs in FY2021. This is reflected in its operating profit (EBITDA) margin of 2.76 percent in FY2021 as against 2.93 percent in FY2020 and 3.66 percent in FY2019, low net profit (PAT) margins of 0.25 times in FY2021 as against 0.18 times in FY2020, and 0.86 percent in FY2019.

Acuite believes the profitability of the group will continue to be modest on account of the majority of turnover being received from the trading nature of operations.

#### >High competition, volatility in raw material prices, and risk of capital withdrawal

VG operates in the textile industry, which is highly competitive and marked by the presence of a large number of unorganized players. The main raw material used is cotton, prices of which are highly fluctuating and depend upon the monsoon. Thus, the group is exposed to fluctuations in the raw material prices of cotton. Further, prices of cotton are regulated by the government that assigns a Minimum Support Price (MSP) and any adverse changes in the government policies with respect to MSP could have an impact on margins. Further, Vivekanand Group is exposed to the risk of capital withdrawal considering its partnership constitution. Any significant withdrawal from the partner's capital will have a negative bearing on the financial risk profile of the group.

#### Rating Sensitivities

- Significant improvement in scale of operations, while maintaining its profitability margins.
- Deterioration in the working capital cycle leading to stress on the debt coverage indicators or the liquidity position of the entity.

#### Material Covenants

None

#### Liquidity Position: Adequate

VG has an adequate liquidity position marked by adequate Net Cash Accruals (NCA) vis-à-vis its maturing debt obligations. VG generated net cash accruals of Rs.8.79 crore in FY2021 while its maturing debt obligations stood at Rs.8.71 crore during the same period. The working capital cycle of the group is efficient while moderating on a Y-O-Y basis, marked by Gross Current Assets (GCA) days of 83 days in FY2021 and 72 days in FY2020. The average bank limit utilization stood at ~70-80 percent for the 6 months ended April, 2022 indicating an additional liquidity buffer. VG has maintained unencumbered cash and bank balances of Rs.6.24 crore as on March 31, 2021 while its current ratio stood moderate at 1.25 times as on March 31, 2021.

Acuité believes that the liquidity of the entity is likely to remain adequate over the near to medium term on the back of expected improving business environment.

#### Outlook: Stable

Acuité believes that VG will continue to maintain a 'Stable' outlook over the near to medium term owing to its established market position and experienced management. The outlook may be revised to 'Positive' in case the group achieves higher than expected growth in revenues and improvement in profitability, working capital management, and its financial risk profile. Conversely, the outlook may be revised to 'Negative' in case of a significant decline in revenues and operating profit margins, or deterioration in the capital structure and liquidity position on account of higher-than-expected working capital requirements.

#### Key Financials

Particulars	Unit	FY 21 (Actual)	FY 20 (Actual)
