Khakhi Baba Construction Company is a proprietorship firm whose proprietor is one of the director in C S Infraconstruction limited i.e. Mr. Ramesh Singh. The firm is engaged into mining and extraction of boulders and the same is sold to CSIL exclusively.

**Analytical Approach**

Acuité has considered the consolidated business and financial risk profiles of C S Infraconstruction Limited (CSIL) and Khakhi Baba Construction Company (KBCC). The consolidation is mainly on account of strong operational and financial synergies and common management. Extent of Consolidation: Full.

**Key Rating Drivers**

**Strengths**

**• Experienced management**

Ms. Pushpa Singh have an experience of 16 years in aforementioned industry while Mr. Ramesh Singh and Mr. Ghurahoo Singh both share an experience of 11 years in the same industry.

Acuité believes that CSIL will continue to benefit from its promoter's extensive experience in the industry.

**• Healthy financial risk profile**

Company's financial risk profile remained healthy marked by high net worth, low gearing and strong debt protection metrics. The net worth of the company stood at Rs.239.77 Crore as on 31 March 2021 (Prov.) as against Rs.235.87 Crore as on 31 March 2020. The gearing level (debt-equity) stood at 0.10 times as on 31 March 2021 (Prov.) as against 0.06 times in 31 March 2020. The total debt of Rs.23.22 Crore as on 31 March 2021 (Prov.) consists of secured loan of Rs.1.16 Crore, Unsecured loan of Rs.2.25 Crore and working capital borrowings of Rs.19.80 Crore. in FY2020. Debt-EBITDA stood at 0.88 times in FY2021 (Prov.) as against 0.27 times in FY2020.

### Weaknesses

- **Intensive working capital nature of operation**

The working capital management of the company is intensive in FY2021 (Prov.) marked by Gross Current Assets (GCA) of 392 days in FY2021 (Prov.) as against 309 days in FY2020. However, the inventory and debtor levels stood low at 45 days and 12 days in FY2021 (Prov.) as against and 31 days and 13 days in FY2020, respectively. High GCA days is mainly due to high other current asset which consist of commercial tax paid, GST recoverable, deposit with govt. authorities and advances to suppliers. The creditor days stood at 178 days in FY2021 (Prov.) as against 196 days in FY2020. As a result, the bank limits stood utilization stood high at 93% in the last six months ending July, 2021. Acuité believes that the working capital requirements will continue to remain intensive over the medium term on account of high other current asset.

- **Highly Competitive industry and dependence on government for revenue booking**

The company is engaged as a civil contractor. This particular sector is marked by the presence of several mid to big size players. The company faces intense competition from other players in the sectors. Risk becomes more pronounced as tendering is based on minimum amount of bidding of contracts. However, this risk is mitigated to an extent as the company has been operating in this environment for last 10 years. Further, project portfolio of CSIL is concentrated in the state of Uttar Pradesh. Any change in geo-political environment would affect their projects at large. Furthermore, any changes in current policies of the state government with regard to change in budget allocation would impact CSIL's revenue considerably. However, the company has been dealing with government bodies for a long time and hence enjoys long term relations.

### Rating sensitivity

- Strong financial risk profile with high net worth.
- Decline in revenue in FY2021 (Provisional) to ~Rs.272.00 Crore from Rs.357.05 Crore in FY2020 due to impact of covid-19 pandemic and nationwide lockdown.

### Material Covenant

None

### Liquidity position: Adequate

The Company has adequate liquidity marked by sufficient net cash accruals to its maturing debt obligations. The company generated cash accruals of Rs.17.11 Crore in FY2021 (Prov.) as against CPLTD of Rs.2.72 Crore for the same period. The cash accruals of the company are estimated to remain in the range of around Rs.30 Crore to Rs.47 Crore during FY2022-24 against CPLTD not more than Rs.6.50 Crore each year for the same period. Company's working capital operations are intensive marked by gross current asset (GCA) days of 392 days in FY2020. As a result, the bank limit utilization stood at 93% in the last six months ending July, 2021. Company maintains unencumbered cash and bank balances of Rs.32.90 Crore as on 31 March 2021. The current ratio stands at 1.77 times as on 31 March 2020.

### Outlook: Stable

Acuité believes that CSIL will maintain a 'Stable' outlook in the medium term on account of experienced management, long track record of operation and significant improvement in operating income. The outlook may be revised to 'Positive' if the company registers higher than expected growth in revenues and net cash accruals while maintaining healthy debt protection metrics. Conversely, the outlook may be revised to 'Negative' in case the company registers lower than expected growth in revenues and profitability or if the financial risk profile deteriorates due to higher than expected working capital requirements.
