Non-cooperation by the issuer/borrower:

Acuite has been requesting for data, information and undertakings from the rated entity for conducting surveillance & review of the rating. However, the issuer/borrower failed to submit such information before the due date. Acuite believes that information risk is a critical component in such ratings, and noncooperation by the issuer along with unwillingness to provide information could be a sign of potential deterioration in its overall credit quality. This rating is, therefore, being flagged as "Issuer not-cooperating", in line with prevailing SEBI regulations and Acuite's policies

interaction with the issuer entity or any data / information from the entity. Sometimes this non co-operation by a rated entity may be due to a result of deterioration in the credit risk profile of the entity. Therefore, Acuité

Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuité's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk. For more details, please refer Rating Criteria "Complexity Level Of Financial Instruments" on www.acuite.in.
