Rating Rationale

Acuité has reaffirmed its long-term rating of '**ACUITE A**' (**read as ACUITE A**) on the Rs.198.80 Cr bank facilities and its short-term rating of '**ACUITE A1**' (**read as ACUITE A one**) on the Rs 151.20 crore bank facilities of Confidence Petroleum India Limited (CPIL). The outlook is '**Stable**'.

Acuité has assigned its long-term rating of '**ACUITE A**' (**read as ACUITE A**) on the Rs.125.00 Cr bank facilities of Confidence Petroleum India Limited (CPIL). The outlook is '**Stable**'.

Rationale for the rating

The rating reaffirmation factors in the group's strong business risk profile supported by revenue growth in FY25 & H1FY26 primarily from bulk/ merchant LPG trading, healthy financial risk profile with balanced capital structure, manageable leverage, and strong liquidity position backed by adequate cash accruals. The rating also draws comfort from diversification of the revenue base and consistent support from promoters. However, operating margins continue to decline in FY25 and H1FY26 due to higher contribution from low margin bulk/merchant trading and initial lower profitability of newly established CNG pumps and reducing revenue contribution from cylinder division. Further, the rating remains constraint due to the ongoing capex towards all the segments (majorly in the Auto LPG Dispensing Station (ALDS) & CNG Cylinder business), timely materialization and stabilization of which remains a key monitorable.

About the Company

Incorporated in 1994, Confidence Petroleum India Limited is based in Mumbai, Maharashtra and is engaged in manufacturing of LPG cylinders and is also a supplier of Auto LPG in India with its network of bottling plants and ALDS across India. The company has its packed LPG cylinder division in the market, under the brand name 'Go Gas'. Further, the company is also engaged into LPG bottling under the brand name 'Gaspoint' catering to the industrial and commercial requirements of their own and offers job work to the companies such as Bharat Petroleum Corporation Limited (BPCL), Hindustan Petroleum Corporation Limited (HPCL), Indian Oil Corporation Limited (IOCL) and Reliance group, to name a few. At present, the company has 15 cylinder manufacturing units, 325 ALDS with 295 currently operational and 68 LPG bottling plants pan India. The company has forayed in CNG pump business on a

franchise model, with agreements with Gail Gas Ltd to set up 100 CNG stations in the city of Bengaluru of which 50 stations have commenced operations. Its board of directors includes

Mr. Elesh Khara, Mr. Nitin Poonamchand Khara, Mr. Vaibhav Pradeep Dedhia, Ms. Ketki Save, Mr. Sumit Bansa, and Ms. Richa Kathuria.

About the Group

Maharashtra based, Confidence Group is promoted by Mr. Nitin Poonamchand Khara. The group has two of its companies, viz; Confidence Petroleum (I)Limited (CPIL) & Confidence Futuristic Energetic Limited listed on the Bombay Stock Exchange (BSE) and National Stock Exchange (NSE). Most of the business concentration comes under CPIL which is engaged in the manufacturing of LPG cylinders, ALDS and is a supplier of LPG in India with its network of bottling plants across India. The group has widespread network of 2000+ dealers & distributors across India spreading in over 22 states. The group has recently forayed into CNG pump business. Further, it also deals in bulk/ merchant trading of LPG gas.

Not Applicable

Analytical Approach

Extent of Consolidation

- Full Consolidation

Rationale for Consolidation or Parent / Group / Govt. Support

Acuité has considered the consolidated view of business and financial risk profiles of Confidence Petroleum India Limited along with its subsidiaries to arrive at this rating. The consolidation is in view of similar line of business and operational synergies between them. List of subsidiaries consolidated has been added below, separately in the Annexures-2.

Key Rating Drivers

Strengths

Established presence in the industry with considerable experience of promoters

The group is promoted by Mr. Nitin Khara and Mr. Elesh Khara, who possess more than two decades of experience in the LPG distribution business. The operations of the group are spread across the country with a total of 15-cylinder manufacturing units, 68 LPG bottling and blending plants and 325 ALDS with 295 currently operational. Therefore, this established position of the group along with diversification to various segment has supported the revenue growth over the years. The group recorded an increase in revenue to Rs.3145.76 Cr in FY2025 from Rs.2698.47 Cr in FY2024 (17% growth), primarily driven by higher LPG bulk/ merchant gas trading volumes, initiation of the CNG Pump business and growth in packed cylinder business. Further, in H1FY2026 revenue recorded substantial growth, stood at Rs.2095 Cr versus Rs.1523.69 Cr in H1FY2025, solely driven from bulk/merchant gas trading. Further, the group is with the help of established track record of operations and management experience, the group has been able to build reputed client profile spanning both private as well as government companies in the energy and oil industry, viz. IOCL, BPCL and HPCL among others. The group also has well-established relationships with suppliers such as Steel Authority of India (SAIL), etc. Also, the group is importing LPG mainly from Iraq.

Acuité believes that the group will continue to leverage its healthy relationships with customers and suppliers, operational track record and management expertise to further grow its presence in the industry.

Healthy financial risk profile

The group has a healthy financial risk profile marked by tangible net worth of Rs.1329.51 Cr as on 31 March 2025 against Rs.1148.80 Cr as on 31 March 2024. The improvement is driven by profit accretion to reserves and proceeds from conversion of share warrants into equity shares. The gearing level of the group remained below unity at 0.40 time as on 31 March 2025,

reflecting a balanced capital structure. While with increasing working capital and long-term debts for capex and business growth, debt coverage indicators moderated in FY25, however, interest coverage ratio (ICR) and Debt service coverage ratio (DSCR) remained comfortable at 4.71 times in FY2025 and 2.64 times in FY2025 respectively.

Acuté believes the overall financial risk profile is expected to remain strong in near to medium term on account of healthy accruals and absence of any substantial increase in the debt.

Moderately intensive working capital operations

The group has a moderately intensive working capital with moderate reliance on limits. GCA days rose to 137 in FY2025 from 127 in FY2024 due to higher deposits/advances for LPG bulk procurement. Inventory days remained stable at 32. Debtor days increased to 36 in FY2025 from 21, though 98% of receivables were collected within 30 days in H1FY2026. Creditor days rose to 14 from 9. Fund-based limit utilization stood moderate at ~70.07%, while non-fund-based limits remained low at ~25.99% over the six months ending November 2025.

Weaknesses

Declining margins

The operating profitability margins of the group is continuously declining from 13.43% in FY2024 to 10.44% in FY2025 and 8.70% in H1FY26. This is driven by higher revenue contribution from low margin bulk/merchant trading, initial lower profitability of newly established CNG pumps and reducing revenue contribution from cylinder division. Further, with increasing interest liabilities PAT margins are also expected to moderate. Therefore, improvement in margins with continued revenue growth remains a key rating monitorable.

Significant capex expansion

The group has outlined a capex of ~Rs. 200 Cr annually across all segments (majorly in CNG and ALDS segment) over the next three years. In FY2025, capex of Rs. 275 Cr was completed. Funding will primarily be through internal accruals, with limited debt. Further, the group is in the process of establishing a terminal at Porbandar Port. Going forward, timely materialization and stabilization of the capex remains a key monitorable.

Exposure to risk inherent in tender-based business and presence in highly regulated business

CG manufactures LPG cylinders and is also engaged in the bottling of LPG for PSU Oil majors. The group gets orders through tenders and operates in a highly fragmented industry, which limits its bargaining power, and may impact its profitability. However, the tenders include an escalation/ de-escalation clause on a monthly basis that restricts the risk to the extent of inventory carried by the group.

Further, the group is exposed to regulatory risks associated with tariff rates and changes in government policies for fuel. The group faces intense competition from other gas filling companies and gas pipeline companies with increased usage of gas pipeline in urban area. In addition to this, the group has to sell the cylinders only through permitted dealers with adequate/required/licensed infrastructure due to explosive/ PESO norms. This risk is to an extent mitigated on account of established network of 2000+ dealers across the country. Further, the group is exposed to volatility of margins as the total raw material cost forms ~69-70% of the total sale value. The prices of gases are decided by PSUs & being volatile in nature may affect group's ability to pass on the incremental prices to its customers.

ESG Factors Relevant for Rating

On the environmental front, the group advanced its sustainability agenda through extensive plantation drives across multiple locations, aimed at enhancing biodiversity, expanding green cover, and fostering long-term ecological balance while reducing its carbon footprint. Socially, the group has demonstrated strong responsibility by making significant contributions to CSR initiatives that benefit communities. On the governance front, the board comprises of highly experienced leaders with a balanced mix of Executive and Non-Executive Directors.

Rating Sensitivities

- Sustainable improvement in the margins along with revenue.
- Timely materialization and stabilization of the capex
- Significant elongation in working capital management impacting the liquidity
- Significant increase in debt levels thereby deteriorating the financial risk profile

Liquidity Position

Strong

The group has a strong liquidity position marked by healthy cash accruals of Rs.265.62 Cr against its maturing debt obligation of Rs.51.84 Cr during the same period. Going ahead, the company is expected to generate cash accruals in the range of Rs.250 Cr – Rs.280 Cr in FY26-FY27 against its maturing debt obligation in the range of Rs.23-25 Cr during the same period. Further, the group has a moderate reliance on working capital limits with moderate fund-based limits utilization of ~70.07% and low non-fund-based limits utilization of ~25.99% over the six months ending November 2025. The group has an unencumbered cash and bank balance of Rs.28.47 Cr as on March 31, 2025. The current ratio stood comfortable at 1.91 times as on March 31, 2025.

Outlook: Stable

Any Other Information

Acuite has noted recent developments relating to search and seizure operations against Confidence Petroleum India Ltd and its Go Gas brand in October 2025, focusing on alleged unlicensed LPG storage, trading, and serious compliance violations. The Income tax raids covered multiple locations, including residences of promoter Nitin Khara and key executives, as part of an ongoing investigation into potential tax evasion and illegal operations. However, as highlighted by the management, the group has not received any notice of tax demand from the Department. Acuite will continue to closely monitor the developments in this regard, and this will remain a key monitorable.

Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuite's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk. For more details, please refer Rating Criteria "Complexity Level Of Financial Instruments" on www.acuite.in.
