The group's overall business profile is supported by A. K. Capital Services Limited (AKCSL) and A. K. Capital Finance Limited (AKCFL). AKCFL is engaged in extending corporate credit and the key offerings include asset backed and cashflow backed financing and structured funding. AKSPL benefits from the established and diversified presence of the group in domestic debt markets. The core business of AKSPL is aligned with the activities of the group. The company initiates exposure of debt securities in the primary market and down sells it to its clients, i.e. provident funds, pension funds, Mutual funds, corporates and individuals. The company's revenue mix also comprises of fee income which is generated from debt placements. The company reported Total Income* of Rs. 28.13 Cr. in FY2024 as against Rs. 5.37 Cr. in FY2023. Acuité believes that the group's strong market presence in the domestic debt market and diversified offerings, established relationships with marquee clients and investors should support AKSPL's business profile over the near to medium term.

Prudent capital structure

AKSPL is directly held by Mr. A K Mittal and family with ~99.7 percent holding. The company's net worth as on March 31, 2024 stood at Rs. 66.80 Cr. as against Rs. 43.94 Cr. as on March 31, 2023. Weakness

Susceptibility of performance to counterparty risk and volatility in capital markets

AKSPL's key earning assets include fixed income earning assets. Since these bonds are issued by corporates (Highly rated bonds), the company remains exposed to credit risks, i.e. risk of deterioration in the credit quality of the issuer. The occurrence of events impacting the credit quality of the issuer is likely to result in challenges in unwinding the exposures to the bond or debentures. Thereby impacting the operating performance of AKSPL. AKSPL's business performance is also linked to the volume of activity in the capital market, especially the debt segment. The performance is influenced by economic cyclicalities and other macroeconomic factors such as GDP, growth rate, inflation and expected movement in interest rates. Adverse events such as a sharp spike in inflationary pressures or hardening of interest rates could translate into muted volumes in the bond markets, thereby translating into lower transaction volumes. The volumes in the debt segment are influenced by factors such as interest rate movement, liquidity and regulatory environment. The ability to generate trading profit/sell down the securities in the portfolio in a profitable manner may be impacted, given the tight liquidity conditions and risk aversion in the debt capital market. Acuité believes that the overall performance of AKSPL will remain sensitive to risks emanating from volatile capital markets, interest rate movements and performance of its portfolio of investments.
