### Key Rating Drivers

#### Strengths

#### • Long track record of operation and experienced Management

Lamina group commenced its operation in the year 1976 with the manufacturing setup for automobile springs under the name of Lamina Suspension Products Limited (LSPL). The group is promoted by Mr. N.V.Hegde, Mr.Guruprasad Adyanthaya and Mr.Tonse Ramesh Shenoy who possess experiences of more than four decades in the casting-forging industry and automobile industry. The promoters are ably assisted by an experienced second line of management. The extensive experience of the promoters has helped the group to maintain healthy relationships with its customer and suppliers. However, due to slow down in the automobile sales, the operating income of the group has declined by around 19.65 percent to Rs.157.31Cr in FY2020 from Rs.195.77Cr in FY2019.

Acuite believes that Lamina group will continue to get benefit from its experienced management, long track record of operation and healthy relationships with its customer and suppliers.

## Weaknesses

### • Working capital operation is intensive in nature

Lamina group's working capital operation is intensive in nature marked by high gross current asset (GCA) days of around 209 days in FY2020 as against 184 days in FY2019. The group had maintained an inventory holding period of around 126 days as on March 31, 2020 as against 99 days as on March 31, 2019. The inventory holding period has stretched in FY2020 due to piling up of finished product that the group was unable to sell due to the outbreak of Covid-19 during the last quarter of the financial year. However, the group maintains high inventory so as to cater the spot orders. The group had extended a credit period of around 74 days as on March 31, 2020 to its customer as against 75 days as on March 31, 2019. On the other hand, the company's credit payment period to its supplier is around 60 days as on March 31, 2020 as against 83 days as on March 31, 2019. The working capital limit is moderate, leading to moderate utilization of its bank line at an average of around 65.75 percent over the last six months through September, 2020, while its peak utilization was high at around 81.93 percent during the same period. Acuite believes that the working capital operations of the company will continue to remain intensive on account of its higher inventory that the group maintains in order to cater to the spot orders.

### • Average Financial Risk Profile

The gearing, however, is expected to be high at around times 1.30 times to 1.50 times as on March 31, 2021.

The revenue of the group has declined by around 19.65 percent to Rs.157.31Cr in FY2020 as against Rs.195.77Cr in FY2019. Since the group is engaged in manufacturing and trading of automotive components and other casting products, the net sales got impacted due to recessionary condition in the automobile market along with the outbreak of Covid-19. EBITDA in absolute term has significantly declined to Rs.9.28Cr in FY2020 from Rs.16.93Cr in FY2019. This is due to fluctuation in raw material prices. The current ratio has improved to 1.46 times as on March 31, 2020 as against 1.31 times as on March 31, 2019. Acuite believes that the liquidity of the group to remain stretched over the medium term on account of low net cash accruals to its debt repayments over the medium term.
