## Key Rating Drivers

### Strengths

#### • Experienced management and long track record of operations

The group is promoted by Ms. Upma Aggarwal, Mr. Sachin Aggarwal and Mr. Navin K. Aggarwal, who have an experience of over two decades in the aforementioned industry. Backed by their experience, they have been able to maintain long-term relations with their customers. The group caters to diversified product range including bakery products and snacks food products. Acuite believes the group will benefit from its experienced management which helps the group in maintaining long standing relations with its customers and suppliers.

- **Healthy financial risk profile**

The group has healthy financial risk profile marked by comfortable net worth, and debt protection metrics. The net worth of the group stood at Rs. 13.50 crore as on March 31, 2019 (Provisional) as against Rs. 11.87 crore as on March 31, 2018, owing to comfortable accretion to reserves due to moderate profitability. Gearing levels (debt-to-equity) stood at 0.47 times as on March 31, 2019 (Provisional) as against 0.25 times as on March 31, 2018. Further, the interest coverage ratio stood at 8.42 times for FY2019 (Provisional) as compared to 6.50 times for FY2018. Total outside liabilities to total net worth (TOL/TNW) stood at 1.32 times as on March 31, 2019 (Provisional) vis-à-vis 1.22 times as on March 31, 2018. Acuite believes that financial risk profile of the group is likely to remain healthy over the medium term, after considering the debt-funded capex, on account of healthy net worth and debt protection metrics. Further, the timely completion of the project will remain a key rating sensitivity.

- **Efficient working capital management**

The group has efficient working capital operations marked by gross current assets (GCA) of 47 days in FY2019 (Provisional) as compared to 33 days in FY2018. This is on account of debtors' collection period of 12 days in FY2019 (Provisional) as against 7 days in FY2018 and inventory holding period of 29 days in FY2019 (Provisional) as against 17 days in FY2018. The average cash credit utilization for the past six months stood at ~71.96 percent. Acuite believes that the working capital operations of Crazy group will continue to remain efficient on account of level of inventory to be maintained and the credit given to its customers.

## **Weaknesses**

- **Moderate profitability**

The group has comfortable scale of operations. However, the profitability margins are moderate marked by an EBITDA margin of 3.33 percent in FY2019 (Provisional) as against 2.40 percent in FY2018. Further, the group operates in a highly competitive and fragmented nature of industry and faces tough competition from various organized and unorganized players which could impact the bargaining power with the customers and hence, the margins. Acuite believes that the group's ability to diversify its product base, since the group is in the process of manufacturing new products like layered cake to cater to the domestic market, will remain a key rating sensitivity.

- **Susceptibility to fluctuation in raw material availability**

The food processing industry is exposed to agro-climatic risks, which might affect the availability of the raw materials in adverse weather conditions. Given the highly regulated nature of the commodity market, the raw materials availability and in turn the group's operations are exposed to changes in government policies.

## **Liquidity position**

The group has healthy liquidity marked by healthy net cash accruals to its maturing debt obligations. The group generated cash accruals of Rs. 2.67 crore for FY2019 (Provisional) while its maturing debt obligations were Rs. 0.14 crore for the same period. The cash accruals of the group are estimated to remain around Rs. 2.68 crore to Rs. 5.93 crore during 2020-22 against repayment obligations ranging from Rs. 1.35 crore to Rs. 1.85 crore. The group's working capital operations are comfortable marked by gross current asset (GCA) days of 47 days for FY2019 (Provisional). The group maintains unencumbered cash and bank balances of Rs. 1.46 crore as on 31 March 2019 (Provisional). The current ratio stands at 1.01 times as on 31 March 2019 (Provisional). Acuite believes that the liquidity of the group is likely to remain healthy over the medium term on account of healthy cash accruals against moderate debt repayments over the medium term.

### Outlook: Stable

Acuite believes that Crazy Group will maintain a 'Stable' outlook over the medium term on the back of its experienced management and healthy financial risk profile. The outlook may be revised to 'Positive' in case the group registers higher-than-expected growth in its revenue and profitability while improving its liquidity position. Conversely, the outlook may be revised to 'Negative' in case the group registers lower-than-expected growth in revenues and profitability or in case of deterioration in the group's financial risk profile or significant elongation in working capital cycle.
