The outlook is '**Stable**'.

The rating on the Rs.20.00 Cr. proposed PP-MLD issue of UGRO is provisional and the final rating is subject to execution of following documents:

1. Trust Deed
2. Legal opinion
3. Servicing agreement
4. Assignment agreement

#### **Rating rationale for the principal protected market linked debentures of Rs. 20.00 Cr.:**

The rating takes into account the comfort of dual recourse to the investors. The debt servicing to the investors is supported by regular cash flows of UGRO and the presence of a cover pool (30 percent over-collateralisation as a percentage of the PP-MLD outstanding and accrued but unpaid interest) to support the servicing of the NCDs in the event of non-payment by UGRO.

UGRO shall execute an assignment agreement wherein it would agree to assign the cover pool assets to Chevy Trust 2021 (Trust) on occurrence of a trigger event during the tenure of the facility. On the occurrence of the trigger event, the pool shall be assigned to the Trust without any further deed, notice or action from the Issuer. In turn, the Trust will provide unconditional and irrevocable guarantee to the NCD holders.

The legal maturity of the transaction is 96 Months from the deemed date of allotment. All payments of the issuance (principal and interest) are promised only on the legal maturity. However, the facility also has a call option date after 24 months from the deemed date of allotment. Failure of UGRO to exercise or honour the call option on the Call Option Date will be constituted as trigger event.

The proposed PP-MLDs are linked to G-sec; yield on the NCD depends on the performance of the Reference Index from the Initial Fixing Date to Final Fixing Date.

#### **Assessment of Adequacy of Credit Enhancement**

The debentures shall be backed by an unconditional and irrevocable guarantee provided by the Trust. Further, the servicing of the debentures is supported by the internal accruals of UGRO and the guarantee provided by the Trust to which UGRO shall assign the pool with minimum cover of 1.30 times of the MLD amount outstanding (including accrued unpaid interest). The guarantee shall be invoked on the occurrence of predefined trigger events.

#### **Key Trigger Events for invocation of Trust guarantee are as follows:**

- Failure of the Issuer to exercise or honour the call option on the Call Option Date
- Rating downgrade of the Issuer to BBB or below
- Rating downgrade of the debentures to a level of A (CE) or below
- Capital Adequacy of Issuer falls below 20%
- Gross NPA of Issuer exceeds 5% for any half yearly period
- Net NPA of Issuer exceeds 3% for any half yearly period
- Exit of Promoters/Change in Management Control

- Non-compliance of listing criteria of either equity or debt securities
- Issuer has defaulted in making any payments due on its financial indebtedness

Post Occurrence of the Trigger Event, the pool shall be assigned to the Trust: Chevy Trust 2021 (without any further deed, notice or action from the Issuer) and Trust shall appoint Issuer as the servicer of the cover pool assets transferred.

Event	Timeline
The Servicer shall fund the C&P Account to the extent of collections from the Underlying Cover Pool. All such proceeds to be applied towards payment to Debenture Holders as per the defined Waterfall Mechanism.	T-1 day
Trustee shall transfer the amount due for payment on the debentures from the C&P Account to the Debenture Holder Account. Any proceeds transferred from C&P account to the Debenture Holder Account shall be considered as beneficial payment by the Trust to the Issuer.	T day

#### Pool Characteristics and pre-defined Eligibility Criteria:

The pool consists of secured loans originated by UGRO; Acuite believes that it adds to the strength of the pool's quality. The cover pool is dynamic in nature and has to be replenished as per eligibility criteria to maintain the stipulated over collateralisation levels upon default/amortization of the underlying cover assets. ## Rating Rationale of the Issuer

The rating factors in experienced management and the ability of the management to attract funding from marquee investors. The rating also factors in the high capitalization levels and low gearing levels. The capital adequacy ratio stood at about 62 percent as on June 30, 2021 and 65.02 percent as on March 31, 2021 coupled with low gearing of 0.84 times as on June 30, 2021 and 0.82 times as on March 31, 2021. The company has demonstrated its ability to raise funds of Rs.705.40 Cr. by way of Term Loans, Non-Convertible Debentures, Commercial Paper in FY2021. The company has also diversified its borrowing profile by way of direct assignment transactions of ~Rs. 14 Cr. in FY2021. The rating also derives comfort from the business model which is based on technology adoption at each and every stage, right from initial screening of the borrower to monitoring of the exposures, at the post disbursal stage.

The rating is, however, constrained due to company's philosophy of lending to certain identified sectors and selecting clients based on strict parameters has already impacted the growth of the loan book. The outstanding loan portfolio stood at Rs. 79.14 Cr as on March 31, 2019 which has grown to Rs. 1,316.88 Cr as on March 31, 2021. The outstanding loan portfolio stood at about Rs.1561 Cr. as on June 30,2021. UGRO's Gross Non-Performing Assets (GNPAs) stood at 2.72 percent of its loan portfolio as on March 31, 2021 which increased from 0.95 percent of its loan portfolio as on March 31, 2020. GNPA stood at 2.30 percent as on June 30,2021. The likelihood of resurgence of the COVID19, and consequent lockdowns in most of the areas at different points in time can impact the recovery of the NBFCs like UGRO particularly focussed on the MSME sector and the ability of company to navigate the subsequent wave(s) of COVID19 with minimal loss and scaling up its loan book, while containing its asset quality and operating expenses will be key monitorable.

## Analytical Approach

Acuite has considered the standalone financial and business risk profile of UGRO to arrive at the rating.

## Key Rating Drivers

### Strengths

- **Experienced management team supported by marquee investors:**

UGRO commenced lending operations in 2019 with a focus on lending towards the Micro Small and Medium Enterprises (MSME) segment. The company is headed by Chairman and Managing Director, Mr. Shachindra Nath. Mr. Nath has over two decades of experience in BFSI across insurance, asset management, lending and capital markets sectors. The company is supervised by a majority Independent Board consisting of experienced professional drawn from different background. The other members of the senior management team have experience of around two decades in BFSI sector.

UGRO's management team is supported by marquee investors. UGRO's investors includes private equity players, insurance companies and family offices. The institutional investors include ADV Partners, NewQuest Asia Investments III Limited, PAG (PE firm with focus on the Asia-Pacific region), Samena Capital (a MENA

focused PE investment group). In addition to the Private Equity Investors UGRO through QIP and Private Placement also raised money from domestic AIFs, Insurances Companies, Family Offices. These investors have infused capital of ~Rs. 650 Cr in FY2019 and ~Rs. 240 Cr in FY2020. The ability to attract capital from a diverse set of investors in its initial stage of operations points to the credibility of the top management team. It also reflects the confidence in the business model and strategy. UGRO's net worth stood at Rs. 952.44 Cr. as on March 31, 2021 as compared to Rs. 921.52 Cr. as on March 31, 2020 against which UGRO had earning assets of Rs. 1,334.03 Cr. and Rs. 1,038.48 Cr. respectively. The networth stood at about Rs.955 Cr. as on June 30,2021. The company's capital adequacy ratio stood at 65.02 percent as on March 31, 2021 as compared to 88.25 percent as on March 31, 2020. The capital adequacy ratio stood at about 62 percent as on June 30, 2021. The high capital adequacy (i.e. low gearing, 0.84x as on June 30, 2021 and 0.82x as on March 31, 2021) provides UGRO adequate headroom to raise additional borrowings to support its future growth trajectory.

Acuité believes, that the experienced management team, presence of marquee investors and healthy capitalisation levels will support UGRO's fund raising plans over the near to medium term.

• **Business model based on high level of digitization and adherence to pre-defined policies:**

UGRO's business model is based on technology adoption at each and every stage, right from initial screening of the borrower to monitoring of the exposures, at the post disbursement stage. UGRO's average ticket size is Rs. 15 lacs with maximum single party exposure of ~Rs. 5 Cr. Hence, the portfolio is expected to be granular in nature and with high degree of technological support for effective monitoring of the portfolio. UGRO's target clientele are MSME units from nine identified sectors, which are Healthcare, Education, Chemicals, Food Processing/FMCG, Hospitality, Electrical Equipment's and Components, Auto Components, Light Engineering and Micro Enterprise Segment. UGRO has identified these sectors from an in-depth study and recommendations from external advisory agencies. UGRO divides these sectors into multiple sub – sectors and approach them with concept of eco system around them.

The credit underwriting process and platforms are designed to ensure quick turnaround, without compromising on quality of the loan appraised. The company has put in place credit tools such as scorecards, which help in arriving at the credit decision. The management has developed detailed questionnaires for each sub segment, which help in identifying the key credit issues and sharpening the quality of credit decision.

The systems and process are evaluated and reviewed from time to time to improve their efficacy to the credit process. The company has put in place safeguards to minimize the possibility of dilution of these processes. These include clauses in the Article of Association such as the right of appointment/termination of key managerial personnel directly to the board and ensuring granularity of the portfolio with loan of more than 1 per cent of its Net Worth or to any related party requiring majority board approval and a unanimous consent of its Asset Liability Committee.

Acuité believes that while adherence to stringent underwriting standards may impact the pace of growth of UGRO, it will aid UGRO to maintain its asset quality in a steady operating environment.

## **Weaknesses**

• **Current challenges in operating environment to impact near term growth**

UGRO commenced its lending operations in January 2019 with a focus on lending towards MSME segment across eight identified sectors. The company has been gradually building a granular loan portfolio with a maximum single borrower exposure restricted to ~Rs. 5 Cr. It adopted an organic as well as inorganic growth strategy to expand its loan book in FY20. UGRO disbursed Rs. 1,284.40 Cr in FY2020 and Rs. 1,147.46 Cr. In FY2021. The disbursements occurred through a network of 34 branches as on March 31, 2021, pools brought out from other NBFCs, share in co-origination arrangements with NBFCs and loans to NBFCs for onward lending. Going forward, the management plans to focus on origination from branch network as a key driver of its growth strategy. The company also plans to expand its branch network in Tier III to Tier VI cities across India. As on March 31, 2020, total outstanding loan portfolio was Rs. 860.92 Cr. which grew to Rs. 1,316.88 Cr as on March 31, 2021. The outstanding loan portfolio stood at about Rs.1561 Cr. as on June 30,2021. UGRO's Gross Non-Performing Assets (GNPAs) stood at 2.72 percent of its loan portfolio as on March 31, 2021, which increased from 0.95 percent of its loan portfolio as on March 31, 2020. GNPA stood at 2.30 percent as on June 30,2021.

UGRO has focused on maintaining a granular loan book, hence, the operating costs are expected to be high comprising establishment expenses and employee (marketing, credit, recovery, operations etc.) cost. During

FY2021 these costs accounted for ~71 percent of UGRO's total income (i.e. net interest income and other operating income), improvement from ~85 percent during FY2020. The high operating expenses led to subdued profitability of 1.98 percent Return on Average Assets (RoAA) as on March 31, 2021, despite having low gearing levels. Going forward, the operating costs are expected to be higher on account expansion of branch and employee network. Acuite believes that the company's philosophy of lending to certain identified sectors and selecting clients based on strict parameters may inhibit its ability to scale up its loan book over the near to medium term.

The Company's key target segment i.e. MSMEs have faced pressures on their cash flows due to the nationwide lockdowns. Over the near term, UGRO could face challenges, in terms of higher credit costs on its existing exposures in certain sectors like especially in certain more affected sectors like hospitality, chemical industry, auto ancillary industry, light engineering, etc.

UGRO's credit profile, hitherto, has been underpinned by its track record in raising resources both debt and equity from various investors/lenders. It has also demonstrated the ability to raise funds through avenues like securitisation deals to diversify its sources of funding. Hence the resource raising ability has been adequately demonstrated in the past. Besides continued resource raising ability, Acuite believes that the future credit profile will depend upon management's ability to significantly scale up its loan book while containing its operating and credit cost in an increasingly challenging operating environment.

### **Rating Sensitivities**

- Growth in AUM, profitability and asset quality

#### **For unsupported Rating ACUITE A: Adequate**

As per the asset liability management (ALM) statement dated March 31, 2021, UGRO has positive cumulative mismatch in all of its maturity buckets. The company is adequately capitalised with networth of Rs. 952.44 Cr. coupled with a gearing of 0.8 times as on March 31, 2021. The company's high capitalisation levels provides high flexibility to raise additional borrowings. It also has the flexibility to raise funds through securitisation transactions.
