

Press Release

Anish Infracon India Private Limited

November 03, 2021

Rating Reaffirmed

Total Bank Facilities Rated*	Rs. 170.00 Cr. (Enhanced from Rs. 120.00 Cr.)
Long Term Rating	ACUITE A-/ Outlook: Stable (Reaffirmed)
Short Term Rating	ACUITE A2+ (Reaffirmed)

* Refer Annexure for details

Rating Rationale

Acuité has reaffirmed the long-term rating of '**ACUITE A-**' (**read as ACUITE A minus**) and short-term rating of '**ACUITE A2+**' (**read as ACUITE A two plus**) on the Rs.170.00 crore bank facilities of Anish Infracon India Private Limited (AIPL). The outlook is '**Stable**'.

Rationale for rating reaffirmation

The rating continues to be driven by the long track record of operations and stable business risk profile with a healthy revenue visibility over the medium term. AIPL's financial risk profile continues to remain healthy, marked by adequate liquidity. Acuite expects the business and financial performance is likely to be sustained over the medium term on the back of healthy order book and efficient working capital management.

About the Company

Gujarat-based, AIPL was established as a partnership firm in the year 1978 by Vijapura family. Subsequently, the constitution changed to private limited company in 2010. AIPL is engaged in civil construction work such as, road construction work, sanctioned by the Central and the state government. Currently, AIPL is working in the states of Gujarat, Maharashtra and Madhya Pradesh.

Analytical Approach

Acuité has considered the standalone business and financial risk profiles of the AIPL to arrive at this rating.

Key Rating Drivers

Strengths

- Experienced management and improving business risk profile**

The operations of AIPL commenced in 1978. The company is promoted by Vijapura family and promoters have experience of more than four decades in civil construction and well supported by a second line of generation. Due to established track record in the infrastructure industry, the company has established relations with its customers and suppliers which has benefitted in terms of new orders in competitive bidding.

AIPL's operating income witnessed growth in revenue and profitability over the last year through FY2021 at Rs.275.71 crore from Rs. 240.79 crore in FY2020 and Rs. 125.45 crore in FY2019. Further, the profitability margins have also improved marked by operating margins and PAT margins of 9.46 percent and 6.03 percent in FY2021 as against 7.17 percent and 4.07 percent in FY2020, respectively. The company has unexecuted order book of Rs. 725.61 crore as on September 30, 2021.

Acuité believes that AIPL will continue to benefit from promoters' extensive experience in the industry and its improving business risk profile over the medium term.

- **Healthy financial risk profile**

The financial risk profile of AIIPL is healthy marked by healthy net worth, low gearing and healthy debt protection metrics. The tangible networth increased to Rs.90.41 crore as on 31 March, 2021 as against Rs. 73.31 crore as on 31 March, 2020 on account of infusion of capital and accretion to reserves. The networth includes unsecured loan of Rs.4.00 crore as on March 31, 2021, treated as quasi equity. The company follows a conservative leverage policy as reflected by its peak gearing of 0.54 times as on March 31, 2020. The total debt of Rs. 26.94 crore as on March 31, 2021 (Prov) includes working capital borrowings of Rs. 19.32 crore, unsecured loans of Rs. 4.57 crore and term loan from bank of Rs. 3.05 crore. Since the company also receives support from trade credit and mobilization advances, its dependence on the banking system for working capital limits is moderate. The gearing is expected to remain low in future due to expectations of healthy net worth. In FY2021, net cash accruals increased to Rs.20.21 crore as against Rs.14.12 crore in FY2020. The net cash accruals have increased on account of the increase in net profits. The improving profitability coupled with low gearing levels has resulted in healthy debt protection metrics, with interest coverage ratio (ICR) of 14.11 times and NCA/TD of 0.75 times for FY2021. Acuité expects the coverage indicators of AIIPL to remain healthy on account of the expansion of profitability margins.

Acuité expects the company to maintain its financial risk profile on account of improving profitability and moderate working capital requirement.

Weaknesses

- **Project execution risk**

AIIPL undertakes civil projects for government entities. Further, timely completion of projects is dependent upon the time taken for handing over of land from the concerned authorities and for execution of work without any hindrances. The financial risk profile of AIIPL will be directly impacted due to any delays caused by the above two factors. Further, AIIPL, being a sponsor, would have to extend support to its SPVs, in case of any delays occur in the project execution or delays in receipt of Government grant. Further, the ability of the company to timely completion of a project will be a key rating sensitivity.

- **Competitive and fragmented industry**

AIIPL is into the business of civil construction. This particular sector is marked by the presence of several mid to big size players. AIIPL faces intense competition from the other players in the sectors. Risk become more pronounced as tendering is based on minimum amount of bidding of contracts. However, this risk is mitigated to an extent as management has been operating in this environment for last four decades.

Rating Sensitivity

- Significant growth in operating performance leading to overall improvement in financial risk profile.
- Stretched working capital cycle and deterioration in liquidity position.

Material Covenants

None

Liquidity Position – Adequate

Liquidity of AIIPL is adequate marked by sufficient net cash accruals in the range of Rs.6.71-20.21 crore for the period of FY2018-21 against repayment obligation of around Rs.0.40-2.50 crore over the same period. AIIPL's working capital operations are intensive, as the company is catering to the government entities, marked by gross current asset (GCA) days of 151 in FY2021. The company maintains unencumbered cash and bank balances of Rs.10.51 crore as on March 31, 2021. The current ratio of the company stood at 1.98 times as on March 31, 2021. Acuité believes that the liquidity of the company will remain adequate over near to medium term on account of stable net cash accruals, low repayment obligations and absence of any major debt funded capex plans.

Outlook: Stable

Acuité believes AIIPL will maintain a 'Stable' outlook in the medium term on account of its experienced management and improving business risk profile. The outlook may be revised to 'Positive' in case of substantial growth in revenues with timely execution of orders. Conversely, the outlook may be revised to 'Negative' in case the firm registers lower-than-expected revenues.
