### Key Rating Drivers

#### Strengths

##### • Experience management

The group has been into existence since the incorporation of its flagship company, MTPL, in 1994. The management of the company was headed by Mr. Sudhir Tekriwal and his brother. Currently, his wife, Mrs. Sunita Tekriwal, and son Mr. Shlok Tekriwal and Mr. Mukesh Jain, Mr. Santosh Jain are ably managing the business. Working in the transformers and switchgear industry, since almost 3 decades, has helped the group in establishing business relations with many state power boards.

Acuite believes that the group will continue to benefit from the promoters' experience and established track record of operations in improving its business risk profile over the medium term.

##### • Moderate financial risk profile

The financial risk profile of the group is moderate marked by moderate net worth, moderate gearing (debt-equity) and debt protection metrics. The tangible net worth stood at Rs.11.00 crore (includes Rs.3.39 crore of quasi equity) as on March 31, 2020 as against Rs.9.39 crore (includes Rs.3.21 crore of quasi equity) as on March 31, 2019. ## Weaknesses

### • Working capital intensive operations

The operations of group are working capital intensive operations marked by Gross Current Asset (GCA) days of 164 in FY2020 as compared to 162 days for FY2019. High GCA days are due to high receivables period of 94 days in FY2020 as against 109 days in FY2018. Inventory days stood at 61 days in FY2020 as compared to 46 days in FY2019. The average bank limit utilization remained low at 28 percent for the past trailing 6 months ended February 2021.

Acuite believes that efficient working capital management will be crucial to the group in order to maintain a healthy risk profile.

### • Customer concentration risk

The group faces major customer concentration risk, with more than 85 per cent of the revenue coming from orders by Tamil Nadu Electricity Board. With the public sector undertakings under the power sector in distress, it is a likely risk to depend upon one state board for a major portion of revenue.

None

## Liquidity Position: Adequate

The group has adequate liquidity marked by adequate net cash accruals to its maturing debt obligations. The group generated cash accruals of Rs.0.35-1.75 crore during the last three years through 2018-20, while its maturing debt obligations were Rs.0.05-0.70 crore over the same period. The outlook may be revised to 'Positive' in case the company achieves higher than expected growth in revenues and improvement in profitability, working capital management and debt protection metrics. Conversely, the outlook may be revised to 'Negative' in case of a significant decline in revenues and operating profit margins, or deterioration in the capital structure and liquidity position on account of higher-than-expected working capital requirements.
