

Press Release

Anjani Steels Limited

July 07, 2021

Rating Reaffirmed & Assigned

Total Bank Facilities Rated*	Rs. 183.00 crore (enhanced from Rs. Rs. 156.00 crore)
Long Term Rating	ACUITE BBB-/ Outlook: Stable (Reaffirmed & Assigned)
Short Term Rating	ACUITE A3 (Reaffirmed)

* Refer Annexure for details

Rating Rationale

Acuité has reaffirmed the long-term rating of '**ACUITE BBB-**' (**read as ACUITE triple B minus**) and the short-term rating of '**ACUITE A3**' (**read as ACUITE A three**) on the Rs. 150.41 crore bank facilities of Anjani Steels Limited (ASL). The outlook is '**Stable**'.

Further, Acuité has assigned the long-term rating of '**ACUITE BBB-**' (**read as ACUITE triple B minus**) on the Rs. 32.59 crore bank facilities of Anjani Steels Limited (ASL). The outlook is '**Stable**'.

Reasons for rating reaffirmation

The rating reaffirmation factors in the comfort derived from established track record of operations, experienced management, stable operations in FY2021 despite covid-19 induced lockdown, moderate financial risk profile and adequate liquidity position of the company. The rating also factored in working capital intensive nature of operations and high utilization of working capital limits of the company.

About the company

ASL was incorporated in the year 1994 by Mr. Shiv Dhari Yadav and Mr. Sanjay Kumar Yadav as a private limited company and was later reconstituted as a public limited company in 2007. The company is engaged in manufacturing of steel and alloy steel castings, ingots, billets and all kinds and sizes of re-rolled sectioned viz flats, angles, rounds, squares, hexagons, octagons rail joints, to name a few. The company set up an integrated steel plant at Raigarh (Chhattisgarh), consisting of sponge iron division, induction furnace division & a 12 MW thermal power plant. The integrated steel plant has a capacity of 1,08,000 MT for manufacturing sponge iron, 1,20,000 MT for manufacturing of billets and 125,000 MT for manufacturing of TMT bars as on March 31, 2021.

Analytical Approach

Acuité has considered the standalone business and financial risk profiles of ASL to arrive at this rating.

Key Rating Drivers

Strengths

• Established track record of operations and experienced management

Incorporated in the year 1994, Anjani Steels Limited is promoted by Mr. Shiv Dhari Yadav and Mr. Sanjay Kumar Yadav. The company has been in the business of steel since 1996-97 and the products currently manufactured are billets, being further used for production of long products, i.e. TMT bars, used to cater to the growing demands of various sectors i.e. power sector, infrastructure construction, steel and cement plant construction, commercial & residential houses, among others.

ASL is led by Mr. Shiv Dhari Yadav and Mr. Sanjay Kumar Yadav, who hold experience of more than two decades in the aforementioned line of business. The extensive experience of the promoters is reflected through the established relationships with the company's customers and suppliers. The key customers of the company have no major concentration in revenues. On the back of the stable and repetitive orders by the various customers, the revenues of the company have seen a compound annual growth rate (CAGR) of about 20.33 per cent over the past three years through FY2020 at Rs. 379.62 crore. Further, the company has an average order book of about Rs. 30 crore on rolling-basis (monthly / bi-monthly) which shows adequate revenue visibility.

Further, the company has booked revenue of Rs. 447.42 crore (inclusive of taxes) during FY2021. ASL is expected to continue to leverage its well established relationships with reputed clients and suppliers. Acuité believes that ASL will continue to benefit from its established track record of operations and experienced management and their long standing relationships with reputed customers and suppliers.

• **Moderate financial risk profile**

The financial risk profile of the company is moderate marked by strong net worth, moderate gearing, debt protection metrics and coverage indicators.

The net worth of ASL is strong, estimated at around Rs. 128.12 crore as on 31st March, 2020. The net worth levels have seen improvement over the last three years through FY2020 on account of healthy profitability.

The company has followed a conservative financial policy in the past, the same is reflected through its peak gearing and total outside liabilities to tangible net worth (TOL/TNW) levels of 1.11 times as on March 31, 2018 and 1.06 times as on March 31, 2017, respectively. The leverage levels continue to remain low at around 1.29 times as on March 31, 2019. The total debt of Rs. 133.21 crore as on 31 March 2020 comprises of long-term borrowings of Rs. 23.28 crores and working capital borrowings of Rs. 109.92 crores. Long-term debt has been increased to

The revenue of the company remained stable at Rs. 447.42 crore (inclusive of taxes) during 2020-21, while its operating margins have registered improvement over the previous year based. The healthy profitability levels coupled with moderate debt levels have led to moderate debt protection measures. The NCA/TD and interest coverage ratio for FY 2020 were moderate at 0.10 per cent and 1.81 times, respectively.

Acuité believes that the financial risk profile of the company is expected to remain moderate on back of absence of any major debt funded capex plan and healthy accretion to reserves.

Weaknesses

• **Working capital intensive nature of operations**

ASL's operating cycle remained elongated at 189 days during FY20 as against 153 days in FY19. Due to integrated nature of operations, the company maintains inventory of coal, iron ore, billets and sponge iron for 3-4 months as reflected by inventory days of 148 days in FY20 as against 111 days in the previous year. On the other hand, the company gets a limited credit period from its suppliers, leading to higher reliance on working capital limits. Further, it allows a credit period of around 7-8 days to its customers. ASL's working capital limits over the last twelve months period were utilized at an average of 95 per cent ended May 2021. Acuité expects the operations of the company to remain working capital intensive on account of the high inventory levels maintained by the company due to integrated nature of operations.

• **Highly competitive and cyclical nature of industry**

Steel is a highly competitive industry due to low entry barriers that results in intense competition from the large number of organized and unorganized players present in the market. However, the risk is mitigated to an extent on account of established track record of operations. The material cost is the primary cost driver accounting for ~80 per cent of total sales. Further, the company's revenue and profitability are susceptible to the inherent cyclical nature in the steel industry and volatility in steel prices.

Rating Sensitivity

- Significant improvement in its working capital management.
- Further improvement in profitability levels thereby improving company's debt coverage indicators.
- Decline in average utilization levels of working capital limits.
- Debt-funded capex leading to deterioration of financial risk profile.

Material Covenants

None

Liquidity: Adequate

The company has adequate liquidity profile marked by moderate net cash accruals to its maturing debt obligations. The company generated cash accruals of Rs. 13.50 crore for FY2020 as against debt obligations of Rs. 4.38 crore for the same period. ASL's working capital operations are intensive marked by gross current asset (GCA) of 189 days. High GCA days have led to higher reliance on external borrowings indicated by average utilization of ~ 95 per cent of the working capital limits over the last twelve months ended April 2021. The company maintains unencumbered cash and bank balances of Rs. 0.10 crore as on 31 March, 2020. The current ratio stood at 1.36 times as on 31 March, 2020. Acuité believes that the liquidity of the company is likely to remain adequate over the medium term on account of moderate cash accruals against debt repayments over the medium term.

Outlook: Stable

Acuité believes that ASL will maintain a 'Stable' outlook and will continue to derive benefit over the

medium term due to its extensive experience of promoters. The outlook may be revised to 'Positive' if the company demonstrates substantial and sustained growth in its revenues from the current levels while maintaining its capital structure. Conversely, the outlook may be revised to 'Negative' if the company generates lower-than-anticipated cash accruals, most likely as a result of sharp decline in operating margins, or deterioration in working capital leading to higher reliance on external borrowings thereby impacting its financial risk profile, particularly its liquidity.
