### Weaknesses

#### Operations in highly competitive industry

The company is engaged in engineering business and the particular sector is marked by the presence of several mid to big size players. The firm faces intense competition from the other players in the sectors. Risk becomes more pronounced as tendering is based on a minimum amount of bidding of contracts and hence the firm has to make a bid for such tenders on competitive prices; which may affect the profitability of the firm. However, this risk is mitigated to an extent as the promoters are operating in this industry for years.

### Working Capital intensive nature of Operations

Company operates in the working capital intensive nature of operations as evident from gross current assets (GCA days) of 246 days for FY2022 (PY 386 days) and WCC improved yet higher and stood at 100 days in FY22 (FY21- 271 days). Inventory days of 94 days as on 31 March 2022 as against 151 days in the previous year. Further, debtors' days stood high at 137 days as on 31 March 2022. Debtor days stood high i.e. more than 38% of the total revenue. As per the business trend the majority of revenue is booked in the last quarter of the financial year which was 45% for FY22 hence the debtor days remained high at the year end however the same gets realized in the next quarter of the subsequent fiscal.
