### Analytical Approach

Acuité has taken the standalone view of the business and financial risk profile of PKAPL to arrive at the rating.

### Key Rating Drivers

#### Strengths

- **Experienced management**

The key promoters of the company, Mr. Keshab Kumar Halder, Mr. Prabhat Kumar Halder and Mrs. Rekha Halder have been in the edible oil industry for more than a decade. In addition to this, the promoters are also present in the rice mill industry for 25 years. Acuité derives comfort from the long experience of the promoter.

- **Significant growth in revenue**

The company has improving revenue trend marked by operating income of Rs.187.95 Cr in FY2020 as compared to revenues of Rs.159.88 Cr in FY2019 and Rs.120.34 Cr in FY2018, thereby registering CAGR of 24.97 per cent over two years. The growth in revenue is on account of volume growth in sales driven by increased demand. Acuité believes that the sustainability of the revenue growth would be a key monitorable going forward.

- **Above average financial risk profile**

The company's above average financial risk profile is marked by modest networth, moderate gearing and strong debt protection metrics. The tangible net worth of the company increased to Rs.30.44 Cr as on March 31, 2020 from Rs.26.66 Cr as on March 31, 2019. Further, the debtor period stood at 40 days as on 31st March 2020 as compared to 41 days as on 31st March 2019. Acuité believes that the working capital operations of the firm will remain moderate as evident from efficient collection mechanism and moderate inventory levels over the medium term.

- **Susceptibility of profitability to competitive industry and fluctuations in raw material prices**

The company operates in a highly competitive and fragmented industry and faces tough competition from various established brands in the edible oil industry as well as several unorganized players, which can have an impact on the bargaining powers with the customers and hence on the margins. Profitability margins are also susceptible to raw material price fluctuation and also on the proportion of trading and processing activities of the company. The operating margin of the company stood at 5.11 per cent in FY2020 as compared to 5.36 per cent in the previous year. The PAT margins stood at 1.49 per cent in FY2020 as against 1.27 per cent in FY2019.
