Strengths

Experienced management and long track record of operations

SCPL, a special-class civil contractor, has been into existence for more than three decades with its specialty in laying pipeline for water supply and sewerage under the central government-led scheme 'Jal Jivan Mission' (erstwhile known as National Rural Drinking Water Programme), majorly in the state of Karnataka. Mr. U Seetharam Shetty, the promoter of SCPL, is having 53 years of experience in the line of civil construction. With intent to bid for high value projects, 'Suprada Construction Company' (partnership firm) had been reconstituted into SCPL. SCPL has executed multiple orders which included construction work of water supply components, water supply and underground drainage systems, sports complex, bridges, series of residential school complexes, factories and manufacturing plants and others. With promoter's extensive industry experience and timely execution of past projects, SCPL has been able to establish a long-standing relationship with its suppliers and various government bodies.

Weaknesses

Instance of delays in servicing of debt obligation

There have been recurring delays in the servicing of debt obligations in one of the bank facility, noted since January 2025, as per the term loan statements. Furthermore, the statements indicate that interest was consistently charged at the beginning of each month and typically paid by month-end. However, an exception was observed in January 2025, where interest was charged at the start of the month but was only paid at the end of February 2025

Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuite's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk. For more details, please refer Rating Criteria "Complexity Level Of Financial Instruments" on www.acuite.in.
