Rationale for the rating

The rating continues to factors in MHFSL's established presence in its areas of operations, experienced management and institutional support and representation on board of MHFSL by them. MHFSL's capital structure remains healthy with Capital Adequacy Ratio (CAR) of 35.72 percent as on September 30, 2025 (37.97 percent as on March 31, 2025) and has demonstrated the ability to attract funding from banks and financial institutions at a competitive rate of interest. Acuite believes that the company is well positioned to benefit from the demand for housing finance and centralized in-house credit appraisal/ monitoring processes. Further, the company has increased its disbursements in the gold loan segment which has relatively shorter tenure and higher yields. In FY25, the disbursements towards the housing loan segment stood at 30.33 percent of the overall disbursements. (24.23 percent for H1FY26). The rating, however, remains constrained by the modest scale of operations and

-muted growth despite being in housing finance segment for over 3 decades. Also, the business operations were geographically concentrated with around 76.75 percent of the loan

portfolio concentrated in Karnataka as on September 30, 2025.

Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuite's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk. For more details, please refer Rating Criteria "Complexity Level Of Financial Instruments" on www.acuite.in.
