The working capital bank limit is utilised around 40 per cent for the last six months ended January, 2021.

Acuite believes that working capital operations will remain moderate due to the infrastructure business nature of the firm.

- **Tender based business along with competitive and fragmented industry**

Major business is bagged through open tenders. Hence, the revenue earned is directly dependent upon the quantum of contracts bagged and executed during the year. Risk become more pronounced as tendering is based on minimum amount of bidding of contracts. The firm has to do tendering on competitive prices; this may affect the profitability of the company. This has resulted in fluctuating operating profit margins.

Moreover, the infrastructure sector is marked by the presence of various mid to big size players. It might face intense competition from the other players in the sectors. Risk become more pronounced as tendering is based on minimum amount of bidding of contracts. However, this risk is mitigated to an extent as management operating in this industry for the last two decades.

### Liquidity Position: Strong

RBC has strong liquidity marked by adequate net cash accruals to meet its maturing debt obligations. It has generated cash accruals of Rs.1.36 to 1.77 crore during the last three years through 2018-20, while it's maturing debt obligations is nil for the same period. The firm's working capital operations are moderate as marked by Gross Current Asset (GCA) days of 143 in FY2020. Further, the reliance on working capital borrowings is low, the cash credit limit remains around 40 per cent utilized during the last six months period ended January, 2021. The firm maintains unencumbered cash and bank balances of Rs.3.12 crore as on March 31, 2020.

Acuite believes that the liquidity of the firm will remain strong in near medium term due to the improving scale of operations and no long term debt obligations.

### Outlook: Stable

Acuite believes that RBC will maintain a 'Stable' outlook over the medium term from the industry experience of its partners. The outlook may be revised to 'Positive' if there is substantial and sustained improvement in RBC's operating income or profitability, while maintaining its working capital cycle. Conversely, the outlook may be revised to 'Negative' in case of weakening of its capital structure and debt protection metrics.
