## **Key Rating Drivers**

### **Strengths**

- **Extensive experience and established track record of operations**

SPG was established in 1982 by Mr. Kirti Patel and is currently being managed by his sons- Mr. Nilesh Kirti Patel and Mr. Nitin Kirti Patel. Mr. Nilesh has been a part of the group since 1994. All the promoters have experience of more than three decades in the timber trading industry and also look after the overall operations. The Group trades primarily in teak wood procured from Myanmar (Burma). The Group has established relationship with the suppliers in Myanmar (Burma) for giving SPG access to premium quality teak wood. The Group has generated a revenue of Rs. 145.91 Cr in FY2022 (Prov.) as against Rs.106.66 Cr in FY2021 and Rs.135.12 Cr in FY2020.

Acuité believes the Group is expected to benefit from extensive experience of its promoters and established operational track record.

- **Moderate Financial Risk Profile**

SPG has moderate financial risk profile marked by moderate net worth, moderate gearing and modest debt protection measures. The net worth stood at Rs. 22.88 crore as on March 31, 2022 (Provisional) as against Rs.21.30 crore as on March 31, 2021 and Rs.20.86 Cr as on March 31, 2020. The improvement is on account of accretion of profits to reserves. There is a withdrawal of capital of Rs. 0.50 Cr. in FY2021. The group' total debt of Rs.40.65 crore as on March 31, 2022(Prov.) (Rs.36.04 crore as on March 31, 2021) includes unsecured loans from promoters and directors of Rs.4.04 crore and short term debt of 36.62 crore . Acuité expects SPG's financial risk profile to remain moderate over the medium term in the absence of any major debt funded capex plan.

### **Weaknesses**

- **Elongation in Working Capital**

SPG's operations are working capital intensive in nature marked by high Gross Current Assets (GCA) of 155 days as on March 31, 2022 (Prov) as against 189 days as on March 31,2021 The GCA days are driven by high debtor days. The debtor days stood at 132 days as on March 31, 2022 (Prov) as against 155 days as on March 31, 2021. The fund based working capital limits remain utilised at an average of 95% percent for last 6 months ending March ,2022. SPG pays its creditors either in advance or against delivery, hence no significant credit support is obtained from suppliers by the Group.

Acuité believes the Group's ability to restrict elongation in its working capital cycle will be a key rating sensitivity.

- **Risk related with regulatory changes in domestic and foreign countries**

The imports of the group are exposed to risk related with different regulatory changes in domestic and foreign countries. The imports of the group are subject to import duty by the government of India. Any increase in the import duty may increase the cost of imports of the group. The imports of the group are also exposed to risk related with the changes in regulatory policies of exporting countries (suppliers). The ban in exporting countries could affect the business and financial risk of the group.

- **Competitive and fragmented nature of business**

The group is engaged in the trading of teak woods from countries Myanmar and the group is

selling teak woods to traders located in India and overseas. Further, the industry is marked by the presence of several medium to big size players. This affects the SPG pricing power and affects its profitability.

### **Rating Sensitivities**

- Ability to restrict further elongation in working capital cycle will be key rating sensitivity.
- Ability to maintain stability in financial risk profile.

### **Material covenants**

None

### **Liquidity Position : Adequate**

The group generated Net Cash Accruals (NCA) of Rs.1.05 Cr in FY2021 vis-à-vis no maturing debt obligations as the group does not have any long term debt in its capital structure. The cash accruals of the group are expected to remain in the range of Rs. 1.5-2 Cr. for the FY2022-23 period against no debt repayment obligations. The average utilisation of fund based working capital limits remained highly utilised at approximately 95 percent for the trailing 6 month period until March,2022, while the non-fund based facilities remain un-utilised as on 26/4/2022. In FY2022 (Prov.), the current ratio stood at 1.67 times.

### **Outlook: Stable**

Acuité believes that SPG will maintain a 'Stable' outlook over the medium term owing to its experienced management and established track record of operations. The outlook may be revised to 'Positive' in case the group registers healthy improvement in operating risk profile while restricting working capital cycle elongation. Conversely, the outlook may be revised to 'Negative' in case of decline in revenue or profit margins, or further elongation of working capital cycle leading to increased dependency on bank borrowings deteriorating in the group's financial risk profile and liquidity position.
