and the demonstrated collection efficiency over the past eleven months. Key Risks

Counterparty Risks:

The pool has an average ticket size of Rs. 37,253, minimum ticket size of Rs. 22,500 and maximum of Rs. 50,000. Considering their vulnerable credit profile of the borrowers, the risk of delinquencies/defaults are elevated. These risks of delinquencies are partly mitigated, considering the efficacy of the originator's origination and monitoring procedures.

Concentration Risks:

Since the pool is entirely granular, i.e. underlying assets in the pool are in nature of MFI loans to 3,172 individual borrowers, hence the risk is significantly mitigated.

Prepayment Risk:

The pool is subject to prepayment risks since rate of interest is significantly high and borrowers may be inclined to shift to low cost options (based on availability). Prepayment risks are partially mitigated by prepayment penalty levied by the company for pre-closures. In case of significant prepayments, the PTC holders will be exposed to interest rate risks, since the cash flows from prepayment will have to be deployed at lower interest rates.

Servicing Risk

There is limited track record of servicing PTCs, since this is the first PTC transaction for the originator.

Commingling Risk

The transaction is subject to commingling risk since there is a time gap between last collection date and transfer to payout account.

Regulatory Risk

In the event of a regulatory stipulation impacting the bankruptcy remoteness of the structure, the payouts to the PTC holders may be impacted.

Liquidity Position – Adequate

The liquidity position in the transaction is adequate. The cash collateral available in the transaction amounts to 3.0% of the pool principal. The PTC payouts will also be supported by an internal credit enhancement in the form of over collateralisation (12.00 % of pool principal) and excess interest spread (11.02 % of pool principal).

Key Rating sensitivity

- Collection performance of the underlying pool
- Credit quality of the underlying borrowers
- Decrease in cover available for PTC payouts from the credit enhancement

Material Covenants

The following covenant is included in the transaction structure: The purchase consideration to be paid by the issuer to the originator for purchasing the pool is equal to Series A1 issue price.
