Rating Rationale

Acuite has downgraded its long-term rating to ‘ACUITE BB+’ (read as ACUITE Double B plus) from ‘ACUITE A’ (read as ACUITE A) on the Rs. 10.00 Cr bank facilities of Urjankur Shree Datta Power Company Limited (USDPCCL). The downgrade is on account of information risk. The rating is being flagged as “Issuer Not Cooperating” in line with existing SEBI regulations and Policy in respect of ‘What Constitutes Non-Cooperation’ of Acuite.

About the Company

USDPCCL is a Special Purpose Vehicle (SPV) between Maharashtra Energy Development Agency (MEDA - Government of Maharashtra entity formed to facilitate non-conventional energy sources) and Shree Datta Sahakari Shetkari Sakhar Karkhana Limited (SDSSSK) that operates a 36 MW bagasse based thermal power plant in Kolhapur, Maharashtra. It was incorporated in 2008 and began commercial operations in 2011. USDPCCL has signed an agreement with its associate sugar factory for acquisition of bagasse fee cost against supply of part of electricity generated by it. For the rest of its output it has signed a power purchase agreement (PPA) with MSDDL in 2013 valid for 13 years.

Non-cooperation by the issuer/borrower

Acuite has been requesting for data, information and undertakings from the rated entity for conducting surveillance & review of the rating. However, the issuer/borrower failed to submit such information before the due date. Acuite believes that information risk is a critical component in such ratings, and noncooperation by the issuer along with unwillingness to provide information could be a sign of potential deterioration in its overall credit quality. This rating is therefore being flagged as “Issuer not cooperating”, in line with prevailing SEBI regulations and Acuite’s policies.

Limitation regarding information availability

This rating is based on information available from sources other than the issuer / borrower (in the absence of information provided by the issuer / borrower). Acuite endeavoured to gather information about the entity/industry from the public domain. Any rating with the suffix ‘Issuer not cooperating’ is assigned without any management interaction with the issuer entity or any data / information from the entity. Sometimes this non co-operation by a rated entity may be due to a result of deterioration in the credit risk profile of the entity. Therefore, Acuite cautions lenders and investors regarding the use of such information, on which the indicative credit rating is based.

Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuité's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk. For more details, please refer Rating Criteria "Complexity Level Of Financial Instruments" on www.acuite.in.
