

## Press Release

### Transworld Furtichem Private Limited

November 25, 2021

### Rating Assigned

Product	Net Quantum (Rs. Cr)	Withdrawn Quantum (Rs. Cr)	Long Term Rating	Short Term Rating
<b>Bank Loan Ratings</b>	11.50	0.00		ACUITE A3+   Assigned
<b>Bank Loan Ratings</b>	138.50	0.00	ACUITE BBB   Stable   Assigned	
<b>Total</b>	150.00	0.00	-	-

### Rating Rationale

Acuite has assigned the long term rating of '**ACUITE BBB**' (read as **ACUITE triple B**) and short term rating to **ACUITE A3+** (read as **ACUITE A three plus**) to the Rs.150.00 crore bank facilities of Transworld Furtichem Private Limited (TFPL). The outlook is '**Stable**'.

The rating on TFPL takes into account the sound business risk profile of the Blue Deebaj Group as reflected in its healthy operating margin aided by integrated nature of operations and an established relationship with customers and suppliers. Further, it is also supported by the management's long track record in the sector, and healthy financial position characterized by low gearing and strong debt coverage indicators. These strengths are however, partly offset by the working capital intensity in group's operations, regulatory risks and vulnerability to timely receipt of subsidies.

### About the Company

Transworld Furtichem Private Limited (TFPL) was incorporated in 2004 and is engaged in manufacturing and export of wide range of fertilizers comprising of granulated fertilizers such as Nitrogen-phosphorous-potassium (NPK) mixture fertilizers, Potassium Sulphate (a Potassic Fertilizer) and other products such as sulphuric acid oleum with state of art production facility. It is a government recognised three star export house with plant locations at Roha, Kandla and Mangalore.

### About the Group

Incorporated in 2009- Blue Phosphate Limited (BPL), is Udaipur (Rajasthan) based company engaged in manufacturing of powdered single super phosphate (SSP) and granular single super phosphate (GSSP) and other fertilizers. It is owned by Dhanani family, Mr Zafar Ullah Khan and Transworld Furtichem Pvt Ltd (TFPL).

Blue Deebaj FZCO was established in the year 2008 as a Free Zone Company with Limited Liability under the Jebel Ali Free Zone Authority. The company is involved in the business of manufacturing and trading of chemical fertilizers, agricultural and veterinary pesticides. It has manufacturing, procurement, and marketing offices in Sri Lanka, UAE, Malaysia, Mozambique, Malawi and Zambia.

The group caters to domestic as well as global market of UAE, Malawi, Iraq, Malaysia, Rwanda, Jordan, Mozambique, Sri Lanka, Morocco, Kuwait etc. The Indian entities import and export its goods through Kandla and Neva Sheva port.

## Analytical Approach

For arriving at the ratings, Acuité has consolidated business and financial risk profiles of Blue Phosphate Limited (BPL), Transworld Furtichem Private Limited (TFPL) and Blue Deebaj FZCO

(BDFZCO), hereinafter referred to as the Blue Deebaj Group (BDG). The consolidation is in view of common management, intercompany holdings, operational linkages between the entities and a similar line of business. Acuité has changed its analytical approach to consolidated from earlier standalone approach owing to increased financial linkages with group companies. Extent of consolidation: Full.

## Key Rating Drivers

### Strengths

- **Experienced management along with operational and financial support**

The group is promoted by Dhanani Group which has over five decades of experience in the field of fertilizers, chemicals, packaging and mineral based industries. Their experience and funding support would remain instrumental in aiding the business and the liquidity profile of the group over the medium term. In addition, TFPL operations are supported by Blue Deebaj FZCO (one of the shareholders in TFPL) owing to operational synergies and financial support by way of corporate guarantees for TFPL's loans.

- **Sound operating efficiencies**

Although the overall revenue of the group declined to Rs.777.11 Cr in FY2021 as compared to revenues of Rs.1025.25 Cr in FY2020, the integrated nature of operations of the group, large economies of scale and experienced management have helped operating efficiencies improve, with the operating margin rising to around 9.23 per cent in FY 2021, from 4.97 per cent in FY 2020. The PAT margins stood at 2.82 per cent in FY2021 as against 0.70 per cent as on FY2020. The RoCE levels stood moderate at 6.28 per cent in FY2021 as against 4.06 per cent in FY2020. The profitability margin of the group improved due to stable business risk profile of BPL and TFPL which helped in fetching higher margins along with surge in subsidies and cost optimization in FY2021. The group has already achieved revenues of 535.42 Cr (Provisional) till September 2021, mainly supported by the sharp increase in fertilizer prices during the period.

- **Healthy financial risk profile**

The group's healthy financial risk profile is marked by healthy network, comfortable gearing and strong debt protection metrics. The tangible net worth of the group dipped to Rs.524.72 Cr as on March 31, 2021 from Rs.657.50 Cr as on March 31, 2020 due to withdrawal of capital during the period. Gearing of the group stood comfortable at 0.44 times as on March 31, 2021 as against 0.43 times as on March 31, 2020. The debt of Rs.230.31 Cr consists of working capital from the bank of Rs.214.91 Cr, long term debt of Rs.9.96 Cr, current maturity of long term loan of Rs.4.61 Cr, and unsecured loan of Rs.0.83 Cr as on March 31, 2021. The Total outside Liabilities/Tangible Net Worth (TOL/TNW) stood low at 0.75 times as on March 31, 2021 as against 0.73 times as on March 31, 2020. Reason for strong credit metrics is group's shifting reliance on Pre-shipment credit on foreign Currency which is a sublimit of Cash credit, and has subsequently resulted into low financial cost. The strong debt protection metrics of the group is marked by Interest Coverage Ratio at 3.05 times as on March 31, 2021 and Debt Service Coverage Ratio at 2.28 times as on March 31, 2021. Net Cash Accruals/Total Debt (NCA/TD) stood healthy at 0.19 times as on March 31, 2021. Acuité believes that going forward the financial risk profile of the group will remain healthy over the medium term, in absence of any major debt funded capex plans.

## Weaknesses

- **Working capital intensive nature of operation**

The working capital management of the group is marked by Gross Current Assets (GCA) of 330 days in 31st March 2021 as compared to 252 days in 31st March 2020. The high level of GCA days is on account of high level of other current assets consisting of advance given to

other group companies for acquisition of shares, and insurance claim receivable. Further, the inventory period also stood high at 169 days in 31st March 2021 as compared to 127 days in 31st March 2020. However, the debtor period stood moderate at 74 days as on 31st March 2021 as compared to 80 days as on 31st March 2020. The debtor cycle is high as a certain per cent of the price of fertilizers is received as subsidy from the government after raising the bill. Moreover, in FY20, the significant fall in debtors were in line with the Indian ports facing serious inland service shortages amid a countrywide lockdown, exporters and importers were scrambling to move cargo in and out of terminals across the country. The credit terms of the group depends on the crop cycle of the particular region. Acuité believes that the working capital operations of the group will remain at same levels as evident from the high debtor and inventory level over the medium term.

- **Exposure to regulatory risks in the fertilizer industry**

The group is exposed to any regulatory changes made by the government and is also susceptible to delays in subsidy payments from the government, leading to higher reliance on working capital loans. Any delay in the disbursement of subsidy on account of under-budgeting and any changes in the regulatory scenario will remain key rating sensitivity factors.

### **Liquidity Position: Adequate**

The group's liquidity is adequate marked by steady net cash accruals of Rs.42.65 Cr as on March 31, 2021 as against long term debt repayment of Rs.10.44 Cr over the same period. The current ratio stood comfortable at 1.53 times as on March 31, 2021 as compared to 1.37 times as on March 31, 2020. The cash and bank balances of the group stood at Rs.11.90 Cr as on March 31, 2021 as compared to Rs.4.36 Cr as on March 31, 2020. However, the combined fund based limit remained highly utilized at 90.50 per cent over the nine months ended September, 2021. The group has availed loan moratorium and also applied for any additional covid loan of Rs. 4.27 Cr. Moreover, working capital intensive management of the group is marked by Gross Current Assets (GCA) of 330 days on 31st March 2021 as compared to 252 days on 31st March 2020. Acuité believes that going forward any stretch in subsidies receivable by the group can impact the liquidity and hence remains monitorable.

### **Rating Sensitivities**

- Growth in revenue along with improvement in profitability margins
- Elongation of working capital cycle
- Significant increase in subsidy receivables from the government
- Further increase in inter-group loans and advances

### **Material covenants**

None

### **Outlook: Stable**

Acuité believes that the outlook on Blue Deebaj group will remain 'Stable' over the medium term on account of the long track record of operations, experienced management, sound business risk profile and healthy financial risk profile. The outlook may be revised to 'Positive' in case of significant growth in revenue or operating margins from the current levels while improving its capital structure through equity infusion. Conversely, the outlook may be revised to 'Negative' in case of decline in revenue or operating margins, deterioration in financial risk profile or further deterioration in its working capital cycle.
