Key Rating Drivers

Strengths

Sound business profile marked by vintage and strong market position

Gloster Limited has an operational record of around hundred years as the company is operational since 1923. In 1954, Kolkata based Bangur family acquired the company. The group caters to both domestic and overseas markets such as USA, European Union, Middle East countries, Australia, Japan among others. The company has three major product segments namely Hessian & sacking, Yarn, and diversified jute products. Government sacking contributes nearly 30 percent of total revenue which is a regulated business. The group has wide product profile which caters to various industries such as FMCG, Agricultural products, Fashion Textile etc. The current management has more than six decades of experience in the jute business.

The group has undertaken a large expansion plan in GNL to enhance its production capacity. In Phase I, group will add a capacity of 92 tons per day envisaging a capex of Rs 252 Cr. which was earlier expected to be operational by Q4FY23 but currently the phase I commissioning date is extended to Q3FY24 as the company faced difficulties in procuring plant and machinery from Thailand. In Phase II, the group will add another capacity of 46 tons per day involving a capex of Rs 61 Cr. The capacity in Phase II is expected to be operational by Q4FY24. Acuité expects the group to record healthy revenue growth over the medium term backed by capacity addition and healthy order flow from the overseas markets.

The group had undertaken a capex plan of Rs 79 Cr to upgrade and modernize the manufacturing facility of FGIL. This will diversify the group's overall business profile and improve the revenue mix.

Foray into the bag business

On land owned by FGIL, Gloster Ltd plans to set up a bag facility with a daily capacity of 1 lac bags for a capex of 35 crore to be funded by bank loans totalling 10 crore and rest internal funding. As the management is the same, the group is developing the jute project on the surplus land owned by FGIL; FGIL will construct the infrastructure, which subsequently would be leased out to Gloster Ltd.

Weaknesses

Agriculture-based Industry

Jute is an agricultural product, and its supply is highly dependent on weather conditions. The dependency leads to variations in prices and quality from season to season. Considering raw material cost is a major component of the total cost, any price rise affects the profitability of jute companies.

Working capital operations

Group has improved yet high working capital requirements as evident from gross current assets (GCA) of 114 days in FY2023 as compared to 103 days in FY2022. High Working capital requirement is on account of high Inventory Days and receivable days. Inventory days stood at 87 days in FY 23 (82 days in FY22). Debtor days stood at 20 days in FY2023 as against 15 days in FY 22.

Rating Sensitivities

The outlook may be revised to 'Positive' if the group sustains their revenue growth with sustained improvement in profit margin. Conversely, the outlook may be revised to 'Negative' if the group witnesses significant deterioration in financial risk profile or liquidity profile due to higher than expected debt led capex plan.
