## Key Rating Drivers

### Strengths

#### Established track record of operations

Aaquaries Group, under its flagship company AGIL, commenced operations in the year 2007 reflecting an established track record of operations for more than one decade. The group is managed by Mr. Sameer Talim, who has more than 10 years of experience in the pharmaceuticals business

### Weaknesses

#### Material misstatement in information shared by issuer

There have been discrepancies and misstatement in the information provided by the management in regards to the customer information, amount of fixed assets reflected in the balancesheet and lack of clarity on the information provided on the investor of the company i.e. Napean Finvest Private Limited.

#### Funding risk

The company is planning to issue additional preference shares in FY24. The issue size will be around Rs.1200 crore. The company is in the initial process wherein the company is expecting the issue of the preference shares to Napean Finvest Private Limited. However, the tieup is not yet finalized for the amount, which exposes the company to a funding risk.

#### Working capital intensive operations

The group's working capital operations are intensive as evident from Gross Current Asset (GCA) of 233 days as on March 31, 2023, as against 180 days as on March 31, 2022. The inventory levels stood at 64 days for FY23 compared to 64 days for FY22. The inventory is stocked up on the basis of the orders received from the customers. The average inventory holding period is around 1 month. The debtor days stood at 120 days for FY23 as against 93 days for FY22. The average credit period allowed to the customers is around 120 days. The creditor days of the group stood 93 days for FY23 as against 76 days for FY21. Majority of raw materials are procured from China and a credit period of around 180 days are received from the suppliers. Acuite believes that the ability of the company to improve its working capital operations will remain key sensitivity in medium term.

### Note on Complexity Levels of the Rated Instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuite' s categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk.
