**Rating Rationale**

Acuité has downgraded the long-term rating to '**ACUITE C**' (read as **ACUITE C**) from '**ACUITE B**' (read as **ACUITE B**) on the Rs. 72.00 Crore bank facilities and reaffirmed short term rating at '**ACUITE A4**' (read as **ACUITE A four**) on the Rs. 8.00 Crore bank facilities of Amogen Pharma Private Limited (APPL). The rating continues to be flagged as "Issuer Not Co-operating" and is based on the best available information.

The rating downgrade reflects instances of delay in interest servicing in the term loan facility of APPL in June 2025. Further, it is based on information available in the public domain. However, ACUITE has not been able to ascertain the reason for the delays, as the company has been non-cooperative.

**Non-cooperation by the issuer/borrower:**

Acuité has been requesting for data, information and undertakings from the rated entity for conducting surveillance & review of the rating. However, the issuer/borrower failed to submit such information before the due date. Acuité believes that information risk is a critical component in such ratings, and noncooperation by the issuer along with unwillingness to provide information could be a sign of potential deterioration in its overall credit quality. This rating is, therefore, being flagged as "Issuer not-cooperating", in line with prevailing SEBI regulations and Acuité's policies.

### Note on complexity levels of the rated instrument

In order to inform the investors about complexity of instruments, Acuité has categorized such instruments in three levels: Simple, Complex and Highly Complex. Acuité's categorisation of the instruments across the three categories is based on factors like variability of the returns to the investors, uncertainty in cash flow patterns, number of counterparties and general understanding of the instrument by the market. It has to be understood that complexity is different from credit risk and even an instrument categorized as 'Simple' can carry high levels of risk.
