Legal Assessment

The legal opinion to the satisfaction of Acuité is received. The legal opinion cover, adherence to RBI guidelines, true sale, constitution of the trust, bankruptcy remoteness and other related aspects.

Key Risks

Counter Party Risks

In Housing Loans part of the pool, the average ticket size is Rs. 22.84 lakhs, minimum ticket size is Rs. 5.38 lakhs. and maximum is Rs. 3.09 Crore. In LAP loans part of the pool, average ticket size is Rs. 22.79 lakhs, minimum ticket size is Rs. 0.19 lakhs. and maximum is Rs. 16.78 Crores. Considering the vulnerable credit profile of the borrowers, the risk of delinquencies/defaults are elevated. These risks of delinquencies are partly mitigated, considering the efficacy of the originator's origination and monitoring procedures.

Concentration Risks

The pool is moderately granular as underlying pool in the current Pass-Through Certificate (PTC) transaction comprising of Housing loans extended towards 177 individual borrowers and LAP loans extended towards 223 individual and commercial borrowers. In Housing Loans part of the pool, ~23% of these borrowers are concentrated in Karnataka and ~20% of these borrowers are concentrated in Maharashtra. In the Housing loans part of the pool, the top 5 borrowers constitute 17.14% i.e. Rs. 5.54 Cr. of the pool principal O/s. In LAP loans part of the pool, ~24% of these borrowers are concentrated in Chhattisgarh and ~16% of these borrowers are concentrated in Haryana. The top 5 borrowers of pool constitute 41.86% i.e. Rs. 15.12 Cr. of the pool principal O/s.

Servicing Risks

The originator has a healthy track record of servicing PTCs since FY14. Hence, the risk of servicing remains partly mitigated.

Regulatory Risks

In the event of a regulatory stipulation impacting the bankruptcy remoteness of the structure, the payouts to the PTC holders may be impacted.

Prepayment Risks

The pool is subject to prepayment risks since rate of interest is significantly high and borrowers may be inclined to shift to low cost options (based on availability). Further, the asset class being housing loans and LAP loans, the risk of prepayment remains high. In case of significant prepayments, the PTC holders will be exposed to interest rate risks, since the cash flows from prepayment will have to be deployed at lower interest rates.

Commingling Risk

The transaction is subject to commingling risk since there is a time gap between last collection date and transfer to payout account.

Credit Enhancements (CE)

- (i) Excess cash flow (excess interest and principal arising due to non-servicing of Series A2 Investor Payouts) to the tune of 10.00% of the pool principal o/s
- (ii) Cash collateral in the form of Investment in ABFRL Mutual Funds to the tune of 10.00% of the pool principal o/s
- (iii) Excess Interest Spread of 168.61% of the pool principal o/s

Rating Sensitivity

- Credit quality of the underlying pool
- Availability of credit enhancement for PTC payouts
- Adherence to terms and conditions, as stipulated in the Transaction Documents
