Acuité has assigned the long term rating of 'ACUITE BBB-' (read as ACUITE triple B minust) of the Rs. 150.00 Cr. Proposed Bank Loan Facilities of Bhala Finance Private Limited (BFPL). The outlook is 'Stable'.

Rationale for the Rating

The rating factors in the growth in financial performance, disbursements and AUM growth, and adequate capitalisation of Bhala Finance Private Limited. The company's financial performance has shown improvements with a Profit After Tax (PAT) which has increased from Rs 0.21 crore in FY 22 to Rs 3.56 crore in FY 25. The interest income has also seen substantial increase from Rs 3.15 crore in FY 22 to Rs 26.27 crore to FY25. The Assets Under Management (AUM) of the company expanded from Rs. 33.33 Cr. in FY22 to Rs. 166.18 Cr. in FY25 while loan disbursements grew from Rs. 20.86 Cr. in FY2022 to Rs. 102.65 Cr. in FY2025. BFPL has received consistent equity infusions from the promoter to support its growth initiatives, with an additional capital infusion anticipated in FY 26. However, the rating is constrained by geographical concentration in the loan book, which remains primarily focused in Rajasthan. Apart from this aspect the asset quality indicated by GNPA (120 DPD NPA) has declined and stood at 1.50% and NNPA at 0.86% in FY 25; these were at 1.42% and 0.71% in FY 24. The total debt of the company has also increased from Rs 80.61 Cr. in FY 24 to Rs. 138.35 Cr. in FY 25. Going forward, Acuite believes the company's ability to maintain asset quality, and scaling operations profitably would be key monitorables.

(Inclusive of off book DA transaction which commenced in FY25). Disbursement growth followed a similar upward trend, increasing from Rs. 20.86 Cr. in FY 22 to Rs.102.65 Cr. in FY 25.

Adequate Capitalisation and borrowing profile

There have been regular capital infusions by the promoter over the last few years and further capital infusions by the promoter are expected to continue, likely boosting the CAR further in FY26. The net worth of the company has increased from Rs 26.15 Cr. in FY 24 to Rs. 40.67 Cr. in FY 25. The borrowing profile of the company is well diversified, comprising of Non-Convertible debentures (NCDs), bank loans from public sector banks, NBFCs and private banks as well. The total debt for the company for FY 25 rose to Rs. 138.35 Cr. from Rs. 80.61 Cr. in FY 24 and Rs. 23.08 Cr. in FY 22.

Weakness

Moderate Asset Quality

The company has an average overall collection efficiency of 89.80% for FY 25, the asset quality of the company marked by the GNPA stood at 1.50% with 120 DPD NPA policy and NNPA at 0.86%. With a 90 DPD stands at 1.86% for FY 25. The GNPA and NNPA has increased from FY 24 levels at 1.42% and 0.71% respectively. The NPA is mainly coming from the state of Rajasthan. Although the slippages have increased in the softer buckets 1+dpd upto 90 dpd from FY 22 to FY 25, from 2.1% to 3.00% of the AUM in FY 25.

Modest scale of operations coupled with geographic concentration risk

The company has modest scale of operations with an outstanding loan portfolio of Rs. 161.19 Cr. as on March 31, 2025, as compared to Rs. 102.18 Cr. as on March 31, 2024. BFPL's portfolio is exposed to high geographical concentration risk, as 98.24 per cent of the total portfolio is concentrated in only state of Rajasthan. However, BFPL has expanded to Madhya Pradesh and plans to expand in the state of Gujarat to somewhat mitigate the geographic concentration risk. The company has a branch network of 30 branches spread across 22 districts. Generally, the risk profile of an NBFC with a geographically diversified portfolio is more resilient compared to that of entity with a geographically concentrated portfolio.

Acuité believes that modest scale of operations coupled with geographic concentration in its portfolio will continue to weigh on the company's credit profile over the near to medium term.
