The operating and PAT margins of the company have also improved to 9.73 percent and 4.87 percent in FY2019 as compared to 8.39 percent and 3.41 percent in FY2018 respectively.

Acuite believes that SHIPL will continue to benefit from its established presence in the industry and improving business risk profile over the medium term.

#### • Healthy financial risk profile

SHIPL has healthy financial risk profile marked by tangible net worth of Rs.56.29 crore as on 31 March 2019 as against Rs.47.16 crore as on 31 March 2018. The improvement in net worth is attributable to higher accretion to reserves on account of consistent growth in profitability and no major debt funded capex. ## Weaknesses

### • Working capital intensive operations

SHIPL has working capital intensive nature of operations marked by Gross Current Assets (GCA) days of 206 in FY2019 despite improving from 222 days in FY2018. This is majorly due to the collection period of 101 days in FY2019 as against 120 days in FY2018. The stretched debtor days is because of the elongated manufacturing process and delays in payment realization from customers as most of the customers government entities. The company maintains inventory of 87 days in FY2019 as compared to 84 days in FY2018. SHIPL enjoys credit period of 81 days from its suppliers, which moderates the working capital requirements.

Acuite believes that the efficient working capital management will be crucial to the company in order to maintain a stable credit profile.

## Liquidity Position

SHIPL has strong liquidity position marked by healthy net cash accruals against no maturing debt obligations. The company generated cash accruals of Rs.4.45 crore to Rs.11.22 crore during the last three years through 2018-19, while there were no maturing debt obligations over the same period. The cash accruals of the company are estimated to remain around Rs.13 crore to Rs.17 crore during 2020-22. The company's operations are working capital intensive as marked by gross current asset (GCA) days of 206 in FY2019. The working capital limits of the company remains utilised at ~90 per cent during the last six months ended May 2019. SHIPL maintains unencumbered cash and bank balances of Rs.0.12 crore as on March 31, 2019. The current ratio of the SHIPL stands at 1.40 times as on March 31, 2019. Acuite believes that the liquidity of the SHIPL is likely to remain strong over the medium term on account of healthy cash accrual and no major repayments over the medium term.

## Outlook: Stable

Acuite believes that the outlook of SHIPL will remain 'Stable' over the medium term owing to its experienced management and long standing relationships with customers. The outlook may be revised to 'Positive' if the company achieves higher than expected revenue and profitability while effectively managing its working capital cycle. Conversely, the outlook may be revised to 'Negative' if the company undertakes higher than expected debt funded capital expenditure resulting in deterioration in its financial risk profile, particularly its liquidity.
